I couldn't find the space that I was looking for so I created it. A (16+) place where you can make new friends, play various games with people across such a wide variety. Where you can discuss topics like anime and music. A place for the community by the community. I want our members to help shape what we become in the future. Our target audience is 16+, Globally! (18+ for tournaments with prizes). No elitism or any other form of discrimination. We want to provide the **\*\*ULTIMATE\*\*** LFG and Friend Making experience to all of our Members, and we will, with your help! If this is something that interests you deeply, we hope that you'll join our growing community :)

Please PM/comment if you would like a link to our Discord Server :)

^(Please note: we are small and self made; our community is most valuable to people who don't mind waiting for the community to grow organically.)
