hello friends,

i am trying to find a pdf full of slides on how the GME squ33ze may play out. I believe it was circulating in circa mid-January 2021. I have combed through all my documents but cannot find it for the life of me.

i particularly recall that there were some slides on how the squ33ze may play out as a long squ33ze and i remember there was the analogy about how a short squ33ze is akin to a spring which is ever compressed/shut close until one day you let it loose and it has to unwind/release all that energy.

i can't recall any other details other than i think there were multiple versions of this document and i believe the version number ran at least past 13.

i've tried combing through the ss library to no avail.

looking forward to your replies, in the hope that someone has it.
