****EDIT: Friday down 5.11% —** **9th Day 2nd Pop Theory is DEAD. Bummer.****

Welp, here it is. Dayum, this has been by far the flattest first leg of a runup thus far. Very little blue 10% gains. Anyway, today is the day to make or break the ****9th Day 2nd Pop**** theory / pattern. When I said a small gain on Thursday, I was thinking a little more than a quarter of a percent.

To anyone reading this, the main action has long been predicted to be next week, but due to past patterns, I had thought we would see the beginning of the momentum start on day 9. So if it doesn't happen today, that doesn't mean the run is done, just that the 9 day thing is a bust.

Good luck out there and Happy Friday!
