I currently have an IRA with Fidelity that can't be DRS, but I still keep buying with it as I am able.

Today I noticed something I haven't seen before (maybe it's happened, I just haven't noticed it).

I created a limit order to purchase X.565 GME shares for \$147. It went through instantly, but fidelity automatically split the order. Filled X at \$146.89 and 0.565 at \$146.735

Wasn't sure if this was common to auto split, or if there's something else going on.
