My concern is that the remaining 775,000,000 of the 1 billion shares of GameStop that were approved can be dropped onto the market. The argument against that concern presplivend was that the shares for a 7 for 1 split needed to be at 1 billion. Well the splivend was only 3 for 1 so the idea that retail can lock the entire float through DRS has become a bit ridiculous.

It took 9 months to lock 15 million shares and at that rate math shows all current and shelved shares will take 55 years. 15 million DRSd 9 months. 1 billion shares divided by 9 months = 667 months divided by 12 months = 55 years. I really hope I am wrong.
