What I think is the case (I can be very wrong) Computer Share gives to the DTCC the right amount of dividend shares to spread out among the brokers (who are all fucked, because there isn't enough to go around) BUUUUTT all newly issued shares are also issued a corresponding GameStop NFT that is paired to each share the new dividend creates. These NFTs are not dividends themselves, but they are unique, unreproducible, and linked to each newly issued dividend share as a small token of GameStop's appreciation to its loyal shareholders. These NFTs exist on GameStop's new marketplace and will serve as a bridge into the new economy they will create.

My reasoning comes from Page 13 (RC PG13 tweet!) of the GME Prospectus:

[RC Stock Split tweet \"PG13\"](<https://preview.redd.it/gu7py3b7luq81.png?width=589&format=png&auto=webp&s=fd54ac76e1c253bd35f98961ae9eb3c21bc18c89>)

"We may issue units from time to time in such amounts and in as many distinct series as we determine. We will issue each series of units under a unit agreement to be entered into between us and a unit agent to be designated in the applicable prospectus supplement. When we refer to a series of units, we mean all units issued as part of the same series under the applicable unit agreement.

We may issue units consisting of any combination of ***two or more securities*** *described in this prospectus.* ***Each unit will be issued so that the holder of the unit is also the holder of each security included in the unit. Thus, the holder of a unit will have the rights and obligations of a holder of each included security. These units may be issuable as, and for a specified period of time may be transferable as, a single security only, rather than as the separate constituent securities comprising such units.****

I am heavily speculating here- but this would be a great move legally; because of the unique mechanics of a share dividend (instead of a split) it allows for a new pool of shares to be created that are the dividend- and is not legally challengeable as this is an accepted format of dividend. The possible addition of NFT tokens attached to the share dividends (that are not dividends themselves, just a free giveaway to stockholders to encourage participation on GameStop's new marketplace, a valid and legal business model that major companies will be participating in) they can't be challenged in the same way Overstock's crypto dividend was and give GameStop concrete proof of share fuckery.

This gives RC legal grounds to pull all shares (causing MOASS) and host them on their new DEX (separate from the NFT marketplace but linked through Looprings L2 eth environment) that is powered by Loopring layer 2 zkrollups as a new stock exchange where all companies can come for a fraud free market, including newly wealthy apes who want to stake their fortunes in Loops and earn 12% annually, giving them more than enough money to remake this world in the way our Chairman is showing us, by creating wealth and prosperity for all, not just a select few. We can literally make a new world, this is what is at stake.

What fucking icing on the cake if that NFT token was the WuTang album.

[Who would have thought that Shkreli would be a footnote in the story of the financial freedom of the masses.](<https://preview.redd.it/1hz24599luq81.png?width=636&format=png&auto=webp&s=313e99214880e1d2aa74ad44b4dad21fe008c1cf>)

If this is what happens I want major props. If it isnt, don't ridicule me too hard
