My anal itch has now become a burning  
like the whole area is on fire.

But it's not the whole area, it's only one small part. What does this means for GME & MOASS?

Well I think it means we are way beyond novelty pleasure sensations of a light scratch & moving into the more serious implications of an area infected.

But, it's not going to take out my whole system, the sensation seems dire, but it's only one small irritating patch of infection that will soon die.

In conclusion, somehow, the itch at my rectum is an analogy for hedge funds & financial markets.

Not a financial advisor tho so what do I know.

Thus spake NostradAnus.
