Pause Threshold Price

If a security is subject to a Trading Pause, the Pause Threshold Price field will contain the reference threshold price that deviates 10% from a print on the Consolidated Tape that is last sale eligible as compared to every print in that security on a rolling five-minute basis.

Search options available:

- Enter the symbol exactly as it appears in the [Symbol Directory](#).
- Enter the wildcard character (%) to search for issues with a given prefix (e.g., "AB%" will retrieve all issues with symbols that begin with the letters "AB"); or
- Enter the wildcard character (*) only to search for all issues.

The trading halt history for the last year will be displayed for your search. If no information is returned, either there have been no trading halts in the past year for the issue(s) or you may have entered invalid search criteria.
