How do I stay safe from crypto and NFT scams? [#GameStopNFT](#)

- Don't believe anyone who promises you a return on your investment or tells you that they can help you get rich quickly.
- Don't ever send money to someone (or some project) online if they're promising to send it right back. If you send someone assets, it should be because you do NOT expect it back.
- Never give out your confidential or personal information to anyone. That means NEVER sharing your Secret Phrase or Private Key. Even sharing other personal information with strangers – like phone numbers or email address – can allow a malicious person to pursue a social engineering attack.
- Always be careful to use verified platforms with strong security protocols.
- If something feels off, you may have good reason to be suspicious. Don't rush to judgement or FOMO in. Take your time, understand the risks.

We've got your back.
