

Title: Is Gamestop giving us extra equity in the company? Is this why it is a stock split dividend instead of a standard stock split?

With the Stock split dividend I'm pretty sure we are being given extra equity in the company, so why is everyone saying the price of stock post split will be divided by 4?

The common stock increased by 3.33x from 300m to 1b

So anything over 3.33x on the split divi is extra equity.

In short, this dividend will be giving us an extra 0.63x in equity.

Am I wrong? Am I missing something here?
