(Prerequisites for this DD: [The complete DD library](<https://fliphtml5.com/bookcase/kosyg>), Seriously apes. This is going to be the one of, if not the most, important things you'll do in your lives. Preparation is the battle. Execution is the victory. Read and digest the DD. Also there's a large number of DD unaccounted for that I reference in this post as well so credit to everyone of those as well)

Hello apes,

How are all of you?

Confused?

****Angry?****

ZEN??

All of these emotions to me are completely justified.

All of the corruption that has been uncovered....

All of the lies and deceit at the highest levels of "our" financial markets....

All of the ways they tried to and trying to royally fuck us....

All of the patience and diligence that apes have been exerting over these months and some even years. All of it has been quite the journey and as a lurker, dare I say a soothsayer, hiding in the cellar of various subreddits, I have been soaking it all up.

First, some background.

WSB lurker. The First Ape Migration took place I unsubbed from Citadelbets.

(seriously what is a \$CLOV anyway)

I bought my first shares catching the falling knife in early February after reading the DD and doing my own research on the topic and thinking "Fuck it, Mamma didn't raise no paper-handed bitch".

A big golf clap to Robinhood. I mean seriously did they think that apes were that stupid? They literally did [market manipulation](<https://www.investor.gov/introduction-investing/investing-basics/glossary/market-manipulation>) by cutting off the BUYING of shares "tO PrOtEct iNvEstors".

"We didn't turn off the selling"

LOL so y'all decide to manage market risk for us. Thanks for the info Sheriff of Nottingham.

Yeah Vlad and Kenny, make sure you hodl onto that soap nice and tight.

(Happy Late Birthday Kenny, thanks for being a complete Wall Street Stooge so that apes had the opportunity to fix this world, also I wanted to get this post out on October 15th because that was the Ides of October and that would have been funny. However, my smooth brain forgot that karma was a thing and I had to whore myself out like a dirty soothsayer).

After months of developing wrinkles, I arrived at a very zen place in my life knowing that the MOASS is inevitable, but no one knows the day when the MOASS will start to leave orbit.

I moved with the apes and lurked on GME sub and lurked on that sub. Then Migration Deux happened and I started lurking in the depths of Superstonk.

What do you know? The reason I stopped paying attention to GME is the same reason I tuned out of Superstonk for a minute.

DRAMA.

Blah blah blah.. did make for some fun weekends though. Reading through some of the back and forth with some of you was beyond hilarious. I upvoted every good post I saw, then started hitting the Boof of confirmation bias.

Then sideways.

We all saw those run ups in March.

Everyone thought we were on the edge of greatness in June.

I thought from [this tweet from Ryan](<https://twitter.com/ryancohen/status/1407896835096678402>) meant that it would be Christmas in July.

I about shit myself when [He](<https://twitter.com/ryancohen/status/1407896835096678402>) tweeted this.

Lost my shit when he tweeted [this](<https://twitter.com/ryancohen/status/1410398196610723842>).

Celebrated my shit when [this](<https://twitter.com/ryancohen/status/1411737540210561036>).

Then sideways.

Yeah, uh so, I think I MIGHT (emphasis on MIGHT) have a TIME FRAME on MOASS launch.

Actually **two** timeframes, one more spontaneous and could happen soon.

The other I'm personally more confident in and makes more sense to me.

Of course, NO dates, well I have some dates, but much like video game launches nowadays, things are kind of iffy on release dates, much like the MOASS will not just be a day event like going out on a fall night waiting for a major new game release. (btw GameStop if you're reading this you should absolutely make that more of a thing, I miss big midnight releases :(. Maybe y'all give a unique NFT for those who waited in line for a game?)

[Also for those who are going to say "oH He'S a Pald ShILL"!] (https://www.reddit.com/r/GME/comments/qbpcqv/fuck_the_shills_diamonds_are_forever/)

Getting a crack at the FUDsters is good enough for me. You couldn't **PAY** me enough money to work for the hive of scum and villainy that is Wall Street. I **love** to see those hilarious posts of shills desperately trying to get apes to sell. Any of you who get shill messages should always post them so the apes can dunk on them more. If you don't want to post them, well that's okay too, just make sure you dunk on them.

Alright enough talk, time for some whiskey.

First of all, Direct registration of shares is akin to tying a diamond noose around SHF and anyone shorting GME. DRS those shares ****ASAP****. I know a call to action is a dirty phrase 'round these parts.

Wait unless everyone buying the Stonk is ****TRYING**** to be an [ACTIVIST INVESTOR.](<https://markets.businessinsider.com/news/stocks/ryan-cohen-gamestop-meme-stock-video-games-activist-investor-gain-2021-8?op=1>)

Apes, the DD is ****NEVER**** done, but in having personal conversations with probably half of the Computershare staff at this point. DRS is definitely da wae.

High Score? Mod11? No Mod 11? Wen the hell moon, Best, I wanted DD not a fluff piece!!!

Patience Ape. You've done it with the stonk, I just ask for your attention. And hey push comes to shove, just hit save for later and never read it :).

I think through reading the discussions on the various subreddits, there really isn't a consensus on how Computershare does their account assignment. Some say 99% confirmed MOD11, Some flex their experiences in X field and have such and such years in X industry and they KNOW that MOD11 isn't it.

To that I say, ****who cares****?

****They're not going to tell you how they do it.****

****That's the price you pay for security.****

It's why they use ****SNAIL MAIL.****

Investigate more into how you can maximize your own damn investment and let the wonderful people at Computershare do their thing and cut their tongues to send out those golden tickets faster.

GameStop will let you know when the final boss is vanquished.

(Side note because this relates to the later parts of this DD, I haven't found ****ANY**** info that GameStop or Computershare ****MUST**** report to ****ANYONE**** except the government that all shares are sold whenever that fateful day happens. They will of course. But I'm not sure they ****HAVE**** to announce ****ANYTHING**** until GameStop is ready to announce something, feel free to tear me a new one in the comments, but if fiduciary duty is in the best interest of the shareholders, I think what I write about will make things more clear.)

That's the end boss modifier people, ****AN INVISIBLE HEALTH BAR****.

Think about it critically. We really have no idea ****HOW**** much these people at the DTC, Market Maker and Hedge fund level have in real ****ACTUAL**** dollars, like down to the penny Kenny keeps in his ass for his one last hit of mayo. We have estimates and records and "reporting requirements", but with all of the fuckery and mischief they have been pulling.

Not to mention any potential "information" that this twisted world of Wall Street has on each other.

It's really going to be over when the Float is locked and loaded, simple as that right?

And that might take a while.

And that is okay.

And hell we might not know until ****GameStop says something****.

This is what an investment is people. Despite the cheap talk that the media pontificates around on their high horse about ["gAmIfIcAtIOn"](<https://www.cnbc.com/2021/08/27/sec-steps-up-research-into-gamificati>)

on-of-trading-with-online-brokers-gary-gensler-says.html). Directly registering your shares in your name is about as [old school](<https://www.newyorker.com/magazine/1959/06/06/a-corner-in-piggly-wiggly>) as it gets in Wall Street. Some representatives I talked to at several brokerages had no idea they even had a "back office". Diamond hands are a mentality, not a fleeting condition to try and buy more crayons to snort or to maybe get lucky and buy a Lambo.

In much the same way that generations of people evolve over time with genetics, culture, science, etc. Wall Street decided to have a cocaine-fueled binge and try to come up with progressively sinister ways to bankrupt companies that were ["the next Blockbuster"](<https://www.fool.com/investing/2019/12/17/is-gamestop-the-next-blockbuster.aspx>). They created more ways to destroy businesses instead of supporting them and only helped out their friends to build the businesses they wanted to succeed. (See Amazon, Bezos, and Solomon Brothers DD. The root of all evil kind of starts there.)

Times like these are hard to believe, but if you trusted your research and the circumstances around you to make the decision to Directly Register your shares, then the rest will be taken care of by, oh I don't know, ****THE COMPANY you bought into****.

To the people that are having hang-ups with their transfer requests.

First of all, I want to say, ****DO NOT SELL YOUR SHARES!****

****ANYONE**** who says to sell your shares is a ****shill**** and a ****snake****.

There's always a way.

Don't fall victim to the FUD.

Don't fall for the bystander effect.

EVERY APE MATTERS!

Brokers?

Yeah they get no pittance, if they aren't transferring your shares because "muh reasons",

File a complaint. (that 741 connection is my personal favorite and probably correct, but we're getting to that)

It's that simple apes, you want the SEC to do their jobs? They have to know what to look for.

Okay now with my massive D (rs) rant done, let's move on to everyone's favorite topic.

CIVICS!

[Apes, we need to make this kind of fashion and architecture relevant again. Beauty is immortalized in art.] (<https://preview.redd.it/brwe422tg4v71.png?width=680&format=png&auto=webp&s=8455e65d161576ad038ecccdf908e227fee876c3>)

More specifically, our boi on the big seat of the Securities Exchange Commission, Gary Gensler.

Tin foil time first: I think this [tweet](<https://twitter.com/ryancohen/status/1392649234944507906>) from Cohen is kind of a wink and a nudge that uh yeah, He met with ****SOME**** official at the SEC. Coincidence? Maybe. But with how notorious Cohen is for loving the beautiful state of [Florida](<https://twitter.com/ryancohen/status/1447407898905268225>) and not moving around much other than to check on his own investment ****AND**** tweeting about a location that's ten minutes away from SEC Headquarters? Yeah, too many coincidences for me. (Sorry whoever posted that information, I was trying

to find you and I couldn't :(, Credit to you whoever it was) Granted, I think the SEC is still doing remote work with COVID requirements for government jobs being how they are. (Can't find the video of the guy who walked in and asked, but credit to you too.)

However, this is a special case and again ****SOMEONE**** had to be there in my opinion.

Now time for Devil's advocate for all of the GG detractors and shills.

Yes, this guy [COULD](<https://www.sec.gov/investor/pubs/regsho.htm>) have done [SOMETHING](<https://www.sec.gov/rules/concept/34-42037.htm>) during these past few months.

****HOWEVER****, My argument for why he ****HASN'T**** done anything revolves around a quote.

"Never interrupt your enemy when they're making a mistake"

Ironic that Napoleon Bonaparte said this. Until he fucked around and found out when he tried to invade Russia and took a hot L at Waterloo, This quote pertains to this saga when in context to Gensler. Hell, he has to check his [own employee's devices](<https://www.reuters.com/legal/litigation/exclusive-us-sec-opens-inquiry-into-wall-street-banks-staff-communications-2021-10-12/>) like an SAT test because these are the kind of forces that he's up against.

Why on Earth would all these [regulations](<https://www.sec.gov/rules/final.htm>) be passed with such frequency?

Why are we only seeing the GameStop report [now?](<https://www.sec.gov/files/staff-report-equity-options-market-struction-conditions-early-2021.pdf>)

Simple, Gensler didn't have enough ****PROOF****.

These lawyers on the Hedgies side are ****NO**** joke. They can find the one line in a contract to completely fuck up the opposition. There is a concept in law that is used called "beyond reasonable doubt", to take down a hedgie, you need a ****SHIT TON**** of proof.

I mean hell, this ****WHOLE**** squeeze has been coasting based on their ability to *****REASONABLY LOCATE**** shares. (Lol, what if the DTC didn't have any shares either like the brokers are starting to find out?)

Think about that ****TWO FUCKING WORDS**** and a ****SHIT TON of MONEY**** have dictated the ****ENTIRE FUTURE**** of [these](<https://twitter.com/ryancohen/status/1400492465442811904>) [unfortunate](<https://twitter.com/ryancohen/status/1346943412663177218>) [companies](<https://twitter.com/ryancohen/status/1367555194196787206>) caught in the foaming jaws of SHF.

What better way to do that than to let these fucks continue their dumb game of greed and expose who they really are?

Now throw some angry apes on top of that.

They really didn't understand [the greater fool theory,](<https://www.investopedia.com/terms/g/greaterfooltheory.asp>) did they.

Collective consciousness focused on the right outcome always wins.

Now we have purple-tinted diamonds...

The apes have been submitting theory after theory trying to explain how the fuck this thing is taking so long, and only recently did we get the playbook. Imagine if shills could kill the DD ****BEFORE**** the likes of [u/atobitt](<https://www.reddit.com/u/atobitt/>) or [u/Criand](<https://www.reddit.com/u/Criand/>) and countless others were writing about Cede & Co's many sins or how to properly explain how the MM and Hedge funds

were using options to hide the true short interest.

Now throw on top of that he has to run ****THE COMMISSION**** for the largest market in the world, trying to unspool ****THE BIGGEST BALL OF YARN IN THE UNITED STATES FINANCIAL HISTORY****. Gensler doesn't just walk into his office and have supreme authority (I mean [some want him](<https://www.warren.senate.gov/newsroom/press-releases/warren-to-sec-chair-at-hearing-regulators-need-to-step-up-to-address-cryptos-regulatory-gaps-and-ensure-an-inclusive-financial-system>) too tho). He has to play by the [rules] (https://en.wikipedia.org/wiki/Dodd%E2%80%93Frank_Wall_Street_Reform_and_Consumer_Protection_Act) too.

[Yes, He worked for the bank of evil, aka Goldman Sachs.](https://en.wikipedia.org/wiki/Gary_Gensler)

Sorry.

You sitting on your ass reading the work of others smoking a blunt (much like myself LMAO, Sativa gang) is not the same as being an executive of one the biggest banks in the world. He's qualified for this shit and KNOWS THE PLAYBOOK. He knows what to look for. He knows how these fucks are trying to fuck you. He came out on the side of retail. Talk is cheap, yes. But expecting these kinds of sweeping changes overnight is an actual smooth brain synopsis.

Would you rather have [one guy to jail again after 2008](https://en.wikipedia.org/wiki/Kareem_Serageldin) or ALL of those responsible get justice? Oh all of them need to pay? Well tough titties apes, you're either going to get moass with no changes to the market structure and potentially unlimited fuckery or get ****MOASS**** with hopefully a better structure after it.

Seriously, do some of you apes not realize you're playing right into the hand of Kenny and Co. when you upvote memes of GG looking like a clown? It may not be shills making the posts, ****BUT**** you can bet your ****ASS**** that those shill fuckers are upvoting and awarding the shit out of those kinds of posts.

It serves two purposes for shills, forum sliding and negative sentiment. Forum sliding in that for every four GG posts with some honestly really fucking lazy captions that aren't funny at all and very low effort, there's an X ape asking if DRS is the way that gets drowned out. It doesn't help the morale of the apes by mocking the ****VERY OFFICAL**** that can ensure that apes get paid. Guys, Ryan Cohen only goes so far as the law allows him to. You know who would let the squeeze hit its peak, oh yeah, ****GG****.

Look, I get it too.

No one should ****EVER**** blindly trust that their government will ****EVER**** do the right thing. You know what you can bet on, ****SELF INTEREST****. Think about it. [GG is already rich](<https://www.bloomberg.com/news/articles/2021-02-12/biden-sec-nominee-gary-gensler-worth-as-much-as-119-million>). He didn't need to take this job. [He didn't need to teach classes on Crypto and Blockchain](<https://ocw.mit.edu/courses/sloan-school-of-management/15-s12-blockchain-and-money-fall-2018/>). He didn't need some of your incessant desires to use Photoshop on his face and having to sift through the various subreddits to see if the citizens engaging in the ****greatest investigation of the financial markets of all time**** were actually right about some of these claims made in various DD.

Most of which has been proven to either be correct or corrected to be correct, also most of the DD is at the top for your reading pleasure.

Read the DD apes. Knowledge is power. Get that bs out of here that people are too busy to read about the most important thing that could change their lives. Wall Street agrees that the commoners shouldn't educate themselves.

My advice, start with my main man [u/DeepFuckingValue](<https://www.reddit.com/u/DeepFuckingValue/>). He's Roaring Kitty on YouTube if you haven't started and just bought blindly into this opportunity.

(Miss you GOAT, may you live in Valhalla for all of your days.)

Even if you can't understand it. No one comes out the womb speaking perfect English or whatever

language you're taught first.

Everyone starts life smooth brained. It takes effort to develop stage 69 autism.

The legacy of completely ridding the market of bad actors once and for all has to be TIT JACKING for GG. He would be a legend amongst apes and the bane of Wall Street, despite his past. Plus, He was on the team that brokered a deal with the NFL when he was an executive at Goldman. I have a sneaking suspicion that GG is a football guy.

You know what Football fans are (well except for powers fans)?

****Loyal.**** Also, his workweek is only about fiveish days a week if he's a diehard fan of the game.

So why are things taking longer potentially, nerds favorite topic, sports.

The rest of the week is for Xvideos obviously.

Gensler only has about a [five year term as SEC Chairman](https://en.wikipedia.org/wiki/U.S._Securities_and_Exchange_Commission). What does one do when they're rich?

Retire?

No, not former Goldman Sucks employees. You build ****Legacy****. You build ****Clout****. You build things that money can't buy. ALL TO GLORIFY THE MASTA!!! MUAHAHAHA!!

Goldman has the keys to not only profit from MOASS on the upswing due to the owning shares...

They have a chance to profit on the downside as well.

(can't find Goldman's put position, but it exists somewhere I'm sure.)

That is of course if this ***rocket** ever comes back to Earth*... *which is unlikely but we're getting there, apes.*

You know it's funny, I have said all of this, but really the only person you need to look at to confirm that GG wants MOASS to happen is his brother, Robert. Robert might not personally own shares, but imagine the bonus he would get from TD Rowe Price Group...

Think about how awkward those Christmas dinners would be if Gary halted trading on our beloved stonk...

"So Gary you want to go over how you fucked me over again with GameStop?"

So detractors who are naturally distrustful of the government.

****Good.****

Seriously, none of what I just stated means ****ANYTHING**** without proper action being taken.

****HOLD OFFICIALS RESPONSIBLE****.

I'm just here to say ****TWO**** things can be true at once, the world isn't as binary as some of you might think it is.

Also, what's the alternative, "The SEC has blocked the buying of GME at 180 dollars permanently because fuck you".

[Yeah that'll go over well on a societal level.](https://en.wikipedia.org/wiki/Fall_of_the_Western_Roman_Empire)

Slow down apes. The world is a complex place full of complex people with differing ideologies and beliefs, just because you're getting frustrated with how the detection, analysis, and execution (or lack thereof for most of the SEC's history) is taking longer than anticipated doesn't mean there won't be the result you're looking for.

These thoughts might be naïve, even foolish. But unfortunately, being the Devil's advocate also requires you to tell the ****FULL**** truth about a situation and not think to be binary one way or another in one's thinking.

Now a rant on those responsible for all of this.

Y'all know why you did what you did. You lived lavishly at the expense of everyone you thought was lower than you.

You took pictures of retail traders and everyday people while sipping down Champagne and laughing at us.....

You drove fancy cars, lived in Mansions, wore the finest clothes and indulged in exotic "stimulants"...

You continually lied and will continue to lie to yourselves and the world by controlling the "information" that most consume on the television through various outlets....

You lost some time ago, but because of your incestuous relationship with money and each other, your strategy was to destroy others and the peasants you look down on to show your dominance. Fitting that Ego and Pride are so pervasive that instead of accepting a single defeat on a trade, you spend months trying to demonize the heroes of this whole saga (retail) and make them seem like they're the enemy that everyday people should worry about, all the while committing the very sins you accuse the apes of.

You used the tools your forbearers used to enrich themselves and successfully destroyed businesses, families, and even the planet itself. All because of your total, utterly, flaccid egos.

Words cannot describe how monstrous these people really are and honestly I can write a whole DD describing how much I hate these people, but these things have already been said.

You become what you hate, and fear what you can't control.

Personally, I chose Love over hate.

Love never fails, after all. Just sometimes it takes a while before it WINS.

I leave you Hedgies and shill acolytes with this.

>"Some people are so poor all they have is money"

No wonder why y'all were fighting this so hard. You're going to be lucky to get five dollars for a BJ behind a Wendy's.

\-----

[This statue needs to return once this is all said and done. A reminder that the everyday person will always be more important than the few who hold us down and tell us what to do. A monument to civility.](<https://preview.redd.it/2dbae553g4v71.jpg?width=640&format=pjpg&auto=webp&s=85259ec28199778c98c5f7639477fdddcbbf3854>)

But [u/BestisWest](https://www.reddit.com/u/BestisWest/), What is the Deal about GameStop?

GameStop's chairman of the board, Ryan Cohen has been busy on Twitter, posting hilarious memes and Early 2000's rap cover looking pics. We've all had our own theories on what he's been saying as really it's our only tell of Cohen's beautiful plans for GME. Some of them are brilliant like the connections to certain US code and Stockbroker Liquidation. There are numerous posts on the subject of 741 and they are all pretty big brained, however I'm putting forward a different idea.

Obviously, more wrinkled brain DD writers than smooth myself have masterfully tied together how GameStop can (and probably will) use NFT's to change their entire business into a 26th century supercompany.

[u/3for100Specials](https://www.reddit.com/u/3for100Specials/) masterworks of a DD's highlights what should happen beautifully and honestly is a must read much more than this dribble of a DD.

Then there is all of the work done on surrounding the derivatives market, total return swaps, security based swaps, and everything else that Wall street uses to screw over the common investors.

But you know what, what if I told you none of that matters?

Well it does matter because all of the hours and months of work by everyday people across these subreddits is the HOW you're getting paid and HOW they've been screwing the little guy.

WHY is because well, I like the stock.

The biggest question everyone has ever had with this saga is.....

WEN MOON!!!!

Well really the question should be.....

WEN TENDIES!!!

Apes, we've been parabolic for months now. This rocket already left the launch pad. Our pilot knows that this is a once in a once event.

Enjoy the show.

Daddy Cohen just wants you to take it all in before we leave this dimension.

BEST, WEN THE FUCK ARE TENDIES!!!!

Damn alright fine, I know this DD is long and pretty arduous to get through so..

So any of you remember that NFTCON that just happened?

Well actually this one was actually a teaser.

A free demo if you will.

Apes that were saying the engagement with NFTCON or that shills were flooding the event might have a point.

****HOWEVER****, I think this assumption that all of the people watching and commenting were shills is wrong. The people running the event probably have some knowledge of what GameStop is cooking and they wanted to use that to promote their event. NFT's are a real force for change on this planet and being salty because GameStop didn't announce anything over the Con is moronic, emotional, childish and flat

out wrong.

Cons like these ****NEED**** to happen. How the hell will the general consciousness of the world know about NFT's if no one is sharing what NFT's can do, regardless of how and what the showcase is.

"ThAt WaS EmBraSsing FoR tHe SubReDdits"

Give me a fucking break. So sticking things up our asses is okay, but showing our collective excitement at ****the future of the internet**** is out of bounds?

Yeah that's what I thought shills, maybe next time try and find some wrinkles before concocting a half coked up infiltration plan like that.

ANYWAY

The next NFTCON's title, I'm not shitting you this is real.

["Future of Finance and NFT's are Decentralized"](<https://www.eventbrite.com/e/nftcon-largest-nft-conference-tickets-186246768097>)

WEN BELIEVE, I WANT A DATE!!!

>!November 30- December 1, 2021. Tickets are \$299.99 dollars.!<

Where is it you might ask?

Yeah Florida.

OMG is that MOASS.

Well maybe.

Or it could be tomorrow

Just like anything in this saga, things aren't that simple.

There's ****NO**** finalized guest list and ****NO**** one on the list is from GameStop explicitly (I asked and no one would give me a straight answer). So if anyone can find a connection with one of the many people listed on the website, have at it. This DD is long enough and I'm not finished yet.

BECAUSE

(DATE SPECULATION OVERLOAD. TITS TOO JACKED. THIS WOULD BE A 69D CHESS MOVE)

Buckle Up, I'm almost done apes, anyone of you still reading is an angel.

Anyone want to remind me what one of Cohen's main investment was before all of this?

Anyone want to tell me what his goal is for this company?

Not to delight customers, although that is the way to secure long term loyalty and ****yeah is the ultimate goal****, but what did the hedgefucks say GameStop was all this time?

"GameStop is a dying brick and mortar retailer"

Wrong. GameStop is trying to become a tech company who sells many different kinds of products and services.

You know who else does this?

Apple.

Cohen wants his company to be like Apple.

What is Apple known for?

Technology, who was the spokesman for Apple?

Steve Jobs. What the fuck did Steve Jobs do on [January 9, 2007?](<https://www.history.com/this-day-in-history/steve-jobs-debuts-the-iphone>)

Announced the original iPhone.

Yeah big whoop, Best, that's it. Jobs didn't even come out with the [*FIRST touch screen phone*](<https://georgiasouthern.libguides.com/c.php?g=612229&p=4545365>)*.*

True, but Apple did the best to ****INNOVATE**** on the idea.

Do you realize what kind of impact the iPhone had on ****TECHNOLOGY**** and ****COMMUNICATION?****

It changed the way we communicate as a species. It changed the way we think about technology.

People used to get offended when you whipped out your phone to check an email or something, now you can't walk down the street without someone or in some cases ****EVERYONE**** is checking their phone.

Cohen wants to do the same thing.

He wants to change the game. Except this time with finance and the Metaverse.

He doesn't care that he wasn't the first to launch a DeFi platform/NFT Marketplace. One of the executives of GameStop even said that buying NFT's is clunky, (LOL hint hint much, needs a sauce though).

Apple wouldn't just pop into some event that claims to be the largest mobile phone event on the drop of a hat.

They used to. I think. Which can make this last part of the DD a moot point if they want to show up for the event on>! November 30th.<

Apple always announces when their going to have an event and they will always host it themselves nowadays.

My opinion, GameStop is going to be doing the same thing.

buuuuuutt no one wants to claim responsibility for MOASS right?

Yeah unless your trying to change the world.

There's no way around this responsibility for Cohen and GameStop writ large.

We sure as shit know that those short on GME don't want it to happen.

Also, for those that think someone from the new board is going to do it.

****No****, Cohen is the man who started this chess match. He's not going to let someone who just got on the board make the checkmate.

He's the one who started all of this. He's going to be the one to end it. Now he has the commission backing

him up. Along with the apes.

I think this whole time he's been saying this through his tweets.

He's been telling us to [DRS](https://twitter.com/ryancohen/status/1418751218566918146). He's been saying who he wants to [work](https://twitter.com/ryancohen/status/1413223954387406851) [with](https://twitter.com/ryancohen/status/1420411942846361612), (shoutout Reggie). He's been saying how apes can be a little ridiculous in their tearing down of every little [block of pixels](https://twitter.com/ryancohen/status/1413669955984236545) of his [tweets](https://twitter.com/ryancohen/status/1420940035042414595). He's been saying how we simultaneously [figured it out](https://twitter.com/ryancohen/status/1394482434171973634), showed the apes [some love](https://twitter.com/ryancohen/status/1395047208748261379), told us what to [expect](https://twitter.com/ryancohen/status/1397047791889879041), and how we [kill him](https://twitter.com/ryancohen/status/1398454505314959361) by not listening and/or him not communicating it properly. He has said how this [monster](https://twitter.com/ryancohen/status/1406678556436877315) will act when its released from the evils of Wall Street and how the established dominance in the financial world will [be](https://twitter.com/ryancohen/status/1407896835096678402) [destroyed](https://twitter.com/ryancohen/status/1410398196610723842). He told [us](https://news.gamestop.com/node/18961/html) how we'll [get it](https://twitter.com/ryancohen/status/1417315406272864258). He told us [what not to do](https://twitter.com/ryancohen/status/1425606429574979584) after we get the tendies. He told us what [he'll be doing with GameStop](https://twitter.com/ryancohen/status/1428518642937892868) after it moons and what the other Wall Street firms shouldn't do post-MOASS. [He called us out](https://twitter.com/ryancohen/status/1442208550600671232) once the apes figured out DRS is the way on masse to help galvanize us to do what we should have been doing since **DECEMBER.**

And he answered that fateful question every single one of us apes have been asking. **TWICE.**

But what about 741?

Do I add them together? Are all of the time stamps meaningful on his tweets?

Stock Broker liquidation? US Codes? July 41st?

Chess anyone?

Dark Side of the Moon anyone?

When was that released?

[Wanna take a guess?](https://twitter.com/ryancohen/status/1431433651414306825)

OR MAYBE ALL OF THESE 741 THEORIES ARE CORRECT THEORIES?!

Remember this RC we're talking about. Him and his team would have to know how things correlated so perfectly?

I would love to see the DD they did to find out how to correlate 741 with all of these moving parts.

Before I finish, I want to take you to a scene from the all time classic blockbuster from 2012.

The Avengers.

Wut?

Stay with me apes, this is what made it click for me.

Remember the scene where Agent Colson shot Loki with that giant gun and Thor got ejected in that circle

pod?

[The scene where Tony and Cap were talking about what Loki's next play was....](<https://www.youtube.com/watch?v=XDIMd6ASM3E>)

Think of the Apes as Cap, Tony as the Wrinkled ones, Loki as Cohen.

(quick side note: Loki is on our side in this example. My autistic brain just puts things together in a strange way and I don't want some of the smoother apes thinking he's against us. Cohen is our man with a plan).

"That was just the previews, this is opening night, and Loki, he's a full tailed ****diva****, He wants flowers, he wants parades, He wants a monument plastered in the sky with his name on i..."

["Son of a bitch"](<https://twitter.com/ryancohen/status/1423766191311519747>)

Guess all of those Iron Man snapping memes made some sort of meme magical connection in my smooth brain.

Best, stop blue balling us wen moon

T*here's also this pesky thing called a gag order that was put on him.....*

Wen no gag?

>!BUT around March 1, 2022.!<

Wat mean?

The NFT Marketplace.

The end of days for CEDE & CO, The DTC, Market Makers, and SHF.

Even JPOW might need to look for a [new job](<https://twitter.com/KelliLamberD/status/1387527295259357184>)....

I can already see it now, Cohen, wearing something fly as fuck and iconic, walking on stage to announce to the world....

"hedgies r fuk"

However, I like to think Cohen would do something about the Ides of March. I'm not Cohen, so its not my call and obviously I'll trust the chairman, but that would be very poetic. Also I wanted a cheeky title for this DD.

Cause all good DD needs a good title.

Too bad this one stinks.

****BEWARE THE IDES OF MARCH !!!!!!! !!!! !****

(March 15, 2022 for those less historically inclined)

TLDR: Ha, got you ape I put it as the title. But you would have known that if you read the post. <3

From the bottom of my heart, I love each and every one of you apes. Your contributions to society post-MOASS makes me tear up every time I think about all the good we're about to do. No one will expect

what you're about to do and everyone has their own plan to help out. Don't let greed and selfishness enter your hearts and minds when we are ****SO CLOSE**** to really fixing things on this beautiful blue rock we call home. Patience is what will bring this home.

Just make sure your doing the right and good thing and you'll never go wrong or bitter.

GAME ON ANON. LONG LIVE GMERICA. POWER TO THE PLAYERS.

Disclaimer: Obligatory Not a financial Advisor. This is but an ape's interpretation. My opinions are my own and the conclusions I come to are my own, agreeing or disagreeing with them is your choice, as always do your own research and come to your own conclusions. These are just opinions based on other opinions. Everyone is allowed to have one. This is also a THEORY of THINGS that MAY happen. Seriously, these are a good chunk of my personally saved DD's. As always, rip and tear into each of these and see if I made a mistake, I would be more than happy to correct anything that might be off. That's the power of crowdsourcing. Correct information and the willingness to listen to indemnification is the antidote for FUD and misinformation. Also this DD isn't as fully sourced as I want it to be but I am but one ape trying to comb through a sea of information that I've been obsessive over for the last year.
