Ok this might sound stupid but hear me out.

4:1 divisplit = you give me 3 shares for a total of 4.

2:1 = those 4 shares become 8 = you give me 4 shares.

After diving deep into math and doing extensive research on the subject, i have concluded that  $3+4 = 7$ .

Thus we have 7 for 1.

\*\*\*End of caffeine fueled speculation\*\*\*

I dont know the word count necesarry for posts so this is just filler:

my dog likes to look me directly in my eyes when shes pooping. Idk what it means, maybe shes looking at me for possible signs of danger because she is in a vulnerable position, or maybe shes thinking "youre going to have to pick this up later so bring a shovel, because its a big one".

Either way i have to pick up poop now.

Also because of rules: gamestop, gme, ryan cohen.
