Hey retards!

You get me now since I was banned from my old stomping grounds at SS for posting about Doug Cifu and infinite liquidity. The mods over there are either on a powertrip or getting paid by someone on our most wanted list. So now YOU here at r/GME have to deal with the ramblings of an insane person.

[WHERE ARE WE?! oh right, the beginning of MORE ASS!!](<https://preview.redd.it/dxhn2808l8a91.jpg?width=500&format;=jpg&auto;=webp&s;=a16302b1118306a37b7630c661569383f38665ac>)

Yesterday I posted two charts showing a clear picture of where we are in the algo cycle vs the 2021 sneeze. At 930am I told a group chat full of apes that I love, that I expected GameStop to make an announcement to pump us into this section of the algo that I've dubbed the "filter off" section of the algo. I believe through discussions with some other algo dd writers that the algo comes down, turns off, filter comes off, however you want to describe it at a certain point in the cycle. This occasional filter off section allows retail buying to actually affect the price (I know crazy right?) - this is likely to measure sentiment and adjust for the next round of the cycle. Driving our volume into off exchange pools to avoid runs during this period might seem helpful to them in the short term but would be very **\*\*VERY\*\*** detrimental to them later on.

Based on my quick crayon scribbles after work this evening, I've done a little bit more half ass digging.

First I guess I should show you what I was showing yesterday.... SS knows to deal with my ADHD but I guess you guys don't know that yet... I can go all over the place so bear with me.

Above is what I was showing yesterday. You can clearly see the algo cycle in action and how we are basically an exact replica of what happened (on a different timeline) heading into the sneeze. I added some crayon dots and lines to help you see the cycle better before having my afternoon snack... your welcome.

[The purple one tasted great!](<https://i.redd.it/vwmoy3h0k8a91.gif>)

The AH split announcement pumped us up a bit early so I am not exactly sure what that will do to these quick timelines I am guesstimating below, I assume not much other than push us up quicker, and I am positive RC and team see this same cycle that I am sharing with you lot of loony bin degens. They will use this cycle to our advantage.

Guesstimating timelines for MO BOOTY is futile but we are getting close imo.

Obviously Kenny, Doug Cifu and frens did some crime and fucked us over the first time so Jan 28 may not have been the "MO BOOTY" date if they had let us run but we were well on the way.

Above, you'll see the charts again but with some timeline guesses based on Jan 28, 2021 date (marked with a yellow arrow).

You'll see that I took the first two highs in this cycle range and cut the time between those in half with the blue lines. Half that time was approximately the timeline of the "lazy snek" zone (not much price action up or down) before launch. Then took half of that time which brought me exactly to the 28th and in our current case, it took me to, yep you guessed it.... \*\*tomorrow!\*\* \*(give or take a few hours.)\*

I'm absolutely entirely stoked for tomorrow. I believe we are at the beginning of our trip to Uranus and things are about to get crazy crazy!! As if they aren't already. I have more digging to do to see how the timelines now line up with the March and June runs in '21 but that will have to wait for another time.

For now I hope this is enough hype to get you through the weekend, I'm taking tomorrow off the internet.

Much love to all of you, and thank you for having me. I guess this will be my new home for a bit at least.

As always,

One last quick question... why can't I add the mo booty word to my posts here? That's an odd rule....
