Here's my senerio, I wake up before the stock market opens deposit cash in my bank account buy at least 2 shares directly from computershare. I know it takes at least five days from my shares to settle.

\* Will I make the cut off on the 18th?

\* GME is currently \$128.54 a share if I buy 2 shares before the market opens is that the price I get my shares for? or do I get the price of the stock after 5 days when my purchase settles?

Much love for ape from ape!
