Hi, I'm an ape from Turkey, and using Midas broker. I have single digit GME shares.

I want to DRS to Computershare, but after I open the website, I'm stuck at " recover user ID ".

This is probably because there are no shares within my name yet.

I had a chat with Computershare consultant and they said that my broker has to initiate the transfer.

I talked to my broker, they said Computershare has to create a request.

Then I asked CS, they said the broker should do it again.

I had this conversation for the past 2 weeks trying to solve it.

If there are any Turkish apes or someone that can help me, I would be incredibly glad.

Especially after today, I'm %100 all in I don't give a f*ck* don't trust my broker nor the DTCC I just want them in my name.

I have the details necessary to transfer.

What should I do in this situation?

Thank you so much, I'm dying to DRS but I JUST DONT KNOW HOW TO IT PLS HELPPP <3
