I have to say, I'm super smooth here. Been playing around on the GME NFTs and using the Konami code...I came across these two things I have a gut feeling lead us down the correct path to solve their "puzzle".

Anomaly 1:

I went click-happy and came across this weird anomaly. There is a jpeg labelled "Data".

I'm not a doctor or anything, but a pic labelled data deserves some looking. The link above will take you direct to the the said piece of artwork. It is huge! 3024x4032...

Anyways, following suite and continuing my click-fest.... I found the "data" file had 13,490 lines of code. Not quite sure what to make of it, but may be worth investigating. Or it could turn out to be a nothing sandwich. That's all way above my paygrade.

After some Google-Fu, I found the origins of the picture. I found it here:

Again, not sure if valuable or not.

I then began thinking it could be a piece of encrypted data saved under the guise of a picture, otherwise known as steganography. Needless to say, the results were as lackluster as my previous attempts. [<https://stylesuxx.github.io/steganography/>](<https://stylesuxx.github.io/steganography/>) did end up giving me an output, but It was a HUGE amount of data and I'm lazy soo....yeah.

This brings me to my other thought...

Anomaly 2:

We've all seen the secrets.txt file videos with the base 64 decoded message, if not, look for it on this or any of the other GME subs (plus I'm too lazy to find it myself and post a link). Anyways, I noticed the Licenses.txt file and decided to have a look.

Here's what it displays:

[<https://www.gstop-content.com/ipfs/Qmb74W13FVsp4BFTJVeSxK7viNhPVKse72ay2Si52AKrhwVlicenses.txt>](<https://preview.redd.it/55l5movwl8b91.png?width=794&format;=png&auto;=webp&s;=a16ef2a978c1d82b1603be861a3f3a8e5d002560>)

That middle part really stuck with me:

" moon\\_1k.hdr - HDR - Apache License 2.0 Please check moon\\_1k.hdr.licenses for full legal text

"

Let's see where it takes us:

I'm not too keen on any of this, but maybe you wrinkles can have a look and see.

That's it, it could be a path, it could be nothing. I just thought I'd throw it out there and see what sticks.

Thanks for your time.
