Artificial Intelligence

They say that the taste of vengeance is bittersweet, but I find it to my liking.

In addition to my undying gratitude for the leadership of GameStop's new Board of Directors and Chairman, I have a gratitude for analyzing the technicals of the stock that I like. Yet, as you know, no sole indicator should ever be used as an all-inclusive signal to go all-in.

However, today \[and in rare fashion\], my Artificial-Intelligence has now agreed to offer its services. The machine learning algorithm is now talking to me - very loudly.

[Artificial Intelligence is now providing its strongest buy signal on the daily chart. As you can see, it is more accurate than any human perception.](<https://preview.redd.it/f4ls4zhpxov81.png?width=945&format;=png&auto;=webp&s;=5ca0efa18541505fcd0fd4bc86fa60ac0b86a542>)

[Artificial Intelligence shows 'Golden Cross' \[bullish signal\] on the Hourly](<https://preview.redd.it/aymqud3rxov81.png?width=676&format;=png&auto;=webp&s;=a2ce4bc70e1660f71336e8b0b374ca360b006c6c>)

[Other independent trend indicators are also showing 'buy'](<https://preview.redd.it/u92dznrsxov81.png?width=945&format;=png&auto;=webp&s;=69a34dd1ed9a5fbcd7657af05f694899e64a0f28>)

TLDR: All I see is 'buy.' And so does this very loud-talking Artificial Intelligence. AI is shouting 'buy.'
