Was skimming through the SEC's FTD Data for the first half of August and found the settlement date for GME FTD's on August 4th was 98,885. 35 days or t+35 after August 4th lands tomorrow or September 8th.

This is the snippet from the line of data

SETTLEMENT DATE|CUSIP|SYMBOL|QUANTITY (FAILS)|DESCRIPTION|PRICE

20210804|36467W109|GME|98855|GAMESTOP CORP (HLDG CO) CL A|152.75

We all know there is fuckery at every corner so I am not trying to hype anybody or set dates just pointing out the obvious. Buy, Hodl. Most metrics and TA have been pointing out for a breakout which is due along with the 90 days ago cycles so maybe this can also apply some upwards pressure.

\\*Side Note\\* Because of the Labor Day Holiday. I believe the T+35 may be pushed back a day which would align it with Thursday, September 9th. We know hedgies would love to dump the stock the day after great earnings so if they could stop bullshitting with kicking the can and just buy back these shares that may counteract downwards pressure.

Link to SEC FTD page below. Individual data sets download as zip file.

TL/DR : August 4th FTD's of 98,855 due this Wednesday/Thursday upon the t+35. May help apply upwards pressure. Fuck Hedgies

Edit: Spelling. Ape dumb
