****TA,DR:**** GME's NFT market is nearly fully built, they are just doing some testing well the shelves are stocked. Should see much more in the near future

****TL,DR:**** Juicy Bits Section has the good stuff

****DISCLAIMERS:**** I am silly and nothing I say should ever influence any financial thoughts! This is not advice, just looking at publicly available information (if using stick to bash keyboard to retrieve it). Also thank you to tenor and giphy for all of my gifs.

****WARNING:**** This post contains images of computer code, this may alarm some readers. If the code is scary, its okay. The AI uprising will not happen yet, it is okay to view behind the curtains before it does.

Introductions

So I saw the new beta site come online and was super excited. Like any good monkey I immediately went in aand pushed all the buttons. Rather quickly (within 5 minutes) was able to link my Loopring wallet using the QR code function and put funds into it via Ramp.

[Real footage during my exploration](<https://i.redd.it/afg1zey4kgp81.gif>)

[Houston its looking pretty sweet from up here!](<https://preview.redd.it/eq3vtdk6kgp81.png?width=1207&format;=png&auto;=webp&s;=8090ff45fa07e62e684855ce97267cb57dbea74e>)

SWEET! What else can we see if we go into my profile:

[BOOOO BORING!!!](<https://preview.redd.it/tukzbey8kgp81.png?width=1205&format;=png&auto;=webp&s;=0e944c1bf6a82e8282386b6cbc362cf50ef288f8>)

As you can see there doesn't seem to be much in there. Just some empty tabs with now data within them. What gives! I thought this was the grandiose NFT market to shatter planets well the rocket launches to the moon! There must surely be more to this.....

Diving into the code

When you visit any website, the server goes "oh hi, here's this big mess of code that runs the website, download it and run it." This code is typically written in HTML, that then loads and runs on your device. this is why you need a web browser (chrome, firefox, internet exploder) to actually make sense of this and make this mess into the white blank pages from before. Every browser has the ability to reveal this code in its native format by right clicking and selecting view page source or inspect.

[Ooooooh what's this button do?](<https://preview.redd.it/kr5rs3rckgp81.png?width=428&format;=png&auto;=webp&s;=2a78b09b7a94e50da72b8eae7de77ba970458eb2>)

[What it feels like using this button](<https://i.redd.it/5sjxz47ekgp81.gif>)

[What we actually find](<https://preview.redd.it/y838lrjfkp81.png?width=269&format;=png&auto;=webp&s;=88137eceb19a061dee1c48d9fbe553d5cfd3a322>)

Now I am not going to bore everyone with the details of HTML or coding, go find a youtube course on it to explain. I am a poor teacher since I know enough code to read some of it, but enough to know **I SHOULD NEVER PROGRAM EVER!** Those scripts each run various parts of the page, like push a button and things happen.

To protect the hard work of the code apes who made this possible and to save your eyes, I will only the post most interesting snippets. Also this appears as a comment at one point:

[Oh rly?](https://preview.redd.it/v8yqet5jkpg81.png?width=399&format=png&auto=webp&s=2a1c5eadc4f001528f3c248d77f395b9c2b3ffe5)

https://i.redd.it/esav1rjkkpg81.gif

Juicy Bits

Well now we are deep into the matrix. Lets see what can be found among the thousands of lines of thing.ready.rocket.launch.soon = "go faster";

GME Mobile Wallet!?! I have not found any direct references to Looprings wallet. The closest I did find my meager stick poking was below. My personal theory is the Gamestop Wallet will just be a branded version of the looping one based on how seamless the wallets behave on the site.

[Well of course have to store the NFTs some how.....](https://preview.redd.it/depfc6lskpg81.png?width=448&format=png&auto=webp&s=5809973fe53c8eb88127c0a8e7294d2207e30441)

https://preview.redd.it/6r2ye02ukpg81.png?width=720&format=png&auto=webp&s=6bb2b82ad4b6c3e28c5434de94a62265deeeba8b

https://preview.redd.it/bh4xhrzulkpg81.png?width=774&format=png&auto=webp&s=fe436e1b2ecfe83fab5774ba5b02dcf90a038102

****Power To the Players****

[If any Web Developers are listening, we need a \"Power to the Apes\" option....](https://preview.redd.it/8wo71fjxkpg81.png?width=466&format=png&auto=webp&s=5c46665b2e405cc7bde69fa0320d5b30227cb04f)

[Going to the moon baby!](https://preview.redd.it/083g2cjzkgpg81.png?width=256&format=png&auto=webp&s=00920f91b385c84e80aa861441ef116972c90d73)

[Hang in there!](https://preview.redd.it/sqjo7ex0lpg81.png?width=346&format=png&auto=webp&s=7079899ea81b0a0d435dfba123ea659ecf34c51f)

[Better be the top result for Cats](https://preview.redd.it/doolpva2lpg81.png?width=600&format=png&auto=webp&s=57b57dad723328ffc7ebf420261f4a8be5aa1fc0)

****What about the partnerships GameStop has formed?****

[Oh look proof the market is built on Loopring's L2 network](https://preview.redd.it/2k9x0v84lpg81.png?width=985&format=png&auto=webp&s=87eefe294ae664f0e7984e1f37af27c5d715ac33)

[IMX's contribution appears to be for minting and contract support](https://preview.redd.it/sugxnld6lpg81.png?width=230&format=png&auto=webp&s=1e295a0eb1641ac27388be5875b467b767d7d4e2)

To better understand these two best to read from their own releases:

<https://medium.loopring.io/gamestop-nft-marketplace-powered-by-loopring-l2-6cdb9289d937>

<https://immutablex.medium.com/immutable-x-protocol-orderbook-solving-order-fragmentation-610c2bf5375b>

Conclusions/ Opinions

After many hours poking the code with the stick there are many nuggets of information that have been confirmed directly from our favorite company. Not just from twitter feeds but from cold hard code that is running the NFT market that is due to come out soon.

My take is that right now the store is mostly built with a rolling out features to verify they all function properly. As this occurs the shelves are being stocked by the creators to make the launch day a success. May we all enjoy the vistas from the moon!
