\>)I know. I made the pic. n guess what. IDGAF mwuahah. GTF In kids. We're doin this. Everyone has asked me to go over this so many times. I guess I'll do it while i can. I'm still here n all.

I had previously covered this situation and then deleted the video because i fucked up the audio tbh. But once i realized that covering this stock would detract me from learning more about GME, I had little time to waste. Now shit's different. Let's look. Previous AMC writeups:

Above are the institutional PUTS/CALLS over time. I personally really don't like the timing of the puts.

That is sorted by highest % change in position for SHORT positions. I know I know. the font is small. But I honestly wanted to give as much unlocked data for you all that I could.

Next, These are your Institutional investors, they report with 13D/G depending if they have 5%/10% ownership.

[Please notice none of them currently show 5%+. kek.](<https://preview.redd.it/iu3xcqvihx71.png?width=1824&format=png&auto=webp&s=be513dce20ef97d0ad3dcbbdd98ccc03b36569735>)

The following three positions on that list are the highest average share prices. I'll dive into these first.

First thing to note. Clear harbor had CLASS A SHARES. kek. common shares are for the common folk.

This shit isn't an error either, because it shows berkshire hathaway with the correct price. ■■■■

\*\*\*BERKSHIRE HATHAWAY\*\* INC DELCL A084670108 \*\*\$411/1 SH \*\*\*

The period previous to that, 6/30/21 showed no discrepancies. Not sure dafuq is goin on in these markets.

Both reporting periods are sus af. gonna dive into 13f's see what was reported. ■■■■■■

Very first thing i noticed which is weird as fuck. the ID's are different for calls / puts. Never noticed it if I've passed it before tbh. Stood out to me.

13

NOW I'll go back to that list ...

Alot of positions with 100,000% + profit. Highest positions is reporting 636,378.53 % profit. That's nice. As written on red, Lowest four positions are most negative % returns.

I went through those 2. should be \$10 on 3/31 and \$2 for 12/31. Still wanna know wtf is with that allocation though..

[Sculptor Capital LP](<https://fintel.io/i/oz-management-lp>)

<https://preview.redd.it/j2fs868w1ix71.png?width=1808&format;=png&auto;=webp&s;=5e61d751e89af034b48b5cd4640c9a5e13dabf83>

It SHOWS \$33 in march per call. but when I ran the handy dandy CALCUFUCKINLATOR it showed me different.

03/31/21 > \$10.21 per share for 1100 shares..

06/31/21 > \$56.67 per share for 492,600 shares...

[PEAK6 Investments LLC](<https://fintel.io/i/peak6-investments1>)

Interesting as shit to me. They paid \$1000 for 10 shares. They also paid \$17000 for 299 shares. kek.

Oh the calls? Fintel was trying to say they paid \$34.26 average share price for 145,042 Calls. I said bullshit and pulled out the 13F for that reporting period, of 06/30/21.

Calc said \$58.30 per call. rough. period before , 03/30/21 was ~\$10 per call.

Here's those 13F's cracked open for 6/30 + 3/30

hahaha. the good news is , it looks like these guys ate a lot of shit on those puts eh? hahaha.

Out of Space. o well. This should be enough to show some strange "profits" being produced off of \$AMC. I tried to stay as little opinionated as possible.
