Gamestop

I see alot of Fud around the CS limit change and that's all been settled for now. However, I still see MARKET order fud so let's discuss

Can Citadel manipulate market orders as we currently are. Yes , it's possible.

When MOBooty starts, and we start seeing xxx,xxx prices can Citadel still manipulate the price..... what Citadel? They will have been Thanos finger fuked way before that point. The DTCC computers running the show after 10k to 100k per share has not left the table.

Worse case scenario is that you test it. Sell a share at market and see what happens. I will try to do a limit first through CS and let the NBBO do its job. If they don't then I will try a market. If that doesn't work then I will send some back to Fudelity. Big deal right, we'll not necessarily. This whole situation calls for Diamon Handed Apes, so you can afford to wait a few days for Fudelity to un-drs some shares in a worse case scenario.

If Fudelity screws us at that point then we'll, I ain't selling shit. INFINITY STOOL is not a joke.

Stay calm, we have a split coming. Our enemies are terrified.
