Citadel Coding Competition

This November, Citadel is partnering with Correlation One to put on one of the biggest coding competition of this school year.

The challenge is called Terminal, a game-based AI where players code strategies to automate gameplay. Top performing students can win up to \$15,000 in cash prizes, an exclusive job opportunities with Citadel, as well as global recognition. Check out this [video](#) to see how Terminal works!

The competition takes place between November 8 - 15. Citadel will provide a flexible structure so that the participants will be able to work anytime during the week to accommodate their schedules. This event is open to all undergraduate, graduate and PhD students. The deadline to sign up is Thursday, November 4,
