“Tell me of Perseus, Papa Noble?” (You)

“Come close my son and join me at the hearth. Listen well to my tale.” (Me)

Point One – Ryan Cohen and his ever expanding Merry Band of Badasses established a rally point in Gamestop via the turn around. They are using the Company as a vehicle for innovative change that probably should have already happened over the last 30 years.

Point Two – NFT Platform – Loopring technology integrating Inter-Planetary File System by Piñata in which every single piece of Intellectual Property has a specific serial number encoded thus prohibiting fraud or spoofing. Anything from a tree, a bottle of whiskey, or even a Stock/Security. Alpha & Beta have been a Proof-Of Work to various titans of commerce, and you can expect reveals of integrating partners relatively soon.

If I had to hazard a guess, I would say that the Merry Band of Badasses (larger now) have acquired the meat and potatoes of Loopring as a corporation. They likely have purchased either License or the entirety of the Loopring Patent for a Blockchain Decentralized Exchange. This would give them leverage against anyone in Finance, or the Grubnerment trying to lean on them. This also hedges against corruption or cronyism via bureaucrats and politicians.

Point Three – Gamestop can act as an agent and trustee of another corporation. They filed with the SEC, and it was approved. (They have also registered GMERICA Entertainment LLC in many countries throughout the world, if you haven't been paying attention. U.S., Canada, United Kingdom...) This means that Gamestop is free to restructure or reorganize their assembling conglomerate at will. This means that Gamestop (or GMERICA) will be a parent company like Alphabet is to Google. BoBBY or BaBY or Blockbuster (theorized that they were seeking a purchase from ATT/Direct TV who has done jack all with the Brand/I.P.) will all be divisions of the larger corporate entity.

Point Four – A Wild Speculation – Ryan Cohen is still working with Bed, Bath, and Beyond. He cannot own stock in both companies while pursuing an Acquisition or Merger. According to their Agreement, he can at any time purchase up to 20% of shares available to the public. If Gamestop doesn't acquire all of BoBBY, they will be acquiring BuyBuy Baby. This transaction will force all direct and derivative action of BoBBY \*and\* Gamestop to be closed out. Securities and Stock Trades, Options, \*Swaps\*, and even \*ETFs\* will have to be settled. (Here, I can can either cash out here, during the short squeeze, or I can HODL for generational wealth.)

Gamestop has 304.52~ million shares available to the public as well as 5.00~ million preferred stock, and 8~ million Class A Common Stock available as compensation and incentives to their employees. We'll say 318 million even. They still have a ceiling of 1,005,000,000 Class A Stock, leaving roughly 682~ million available for the Board of Directors to work with. What can happen in an Acquisition or Merger? Stock Distributions.

BoBBY | -> GME + BoBBY = BoBBY Holders get GME Stock.

BoBBY | -> BoBBY | BaBY = BoBBY Holders get BaBY Stock.

“BoBBY | -> BoBBY | BaBY” -> BaBY | -> GME + BaBY = Certain BoBBY and BaBY Holders get GME Stock.

TL;dr: [I bought BoBBY because Gamestop is either buying all of BoBBY or just BaBY. I am hoping that Gamestop buys a Carved Out/Spun Off BaBY so that I get to keep BoBBY, get BaBY, and then get

converted into Gamestop so that I have multiplied moon tickets while having purchased BoBBY for pennies on the dollar.]( <https://i.imgur.com/oV9iHdc.png>)
