# TLDR: let's put some pressure on eToro like we did for voting, and let's DRS our shares.

Howdy fellow apes, I will try to be fast and go straight to the point.

We all know that is not possible to move open positions out from eToro. What was another thing not possible to do on eToro? **\*\*VOTING\*\***

[As stated on eToro helpcenter, it is not possible to use the voting rights nor to move out open positions.](<https://preview.redd.it/lmdud07xuxy71.jpg?width=2712&format=png&auto=webp&s=b1ab5f1e40cabf2e41f0db6772dbbf761fcbcffd>)

But did we just stop there and accept the fact that we, as shareholders, were simple not able to use our voting rights coming with the possession of a stock? **\*\*No\*\***, we put lot of pressure on eToro, we pushed them to get our rights, and we finally succeed into creating an **\*\*exception to the rule.\*\***

[We did vote at the end, thanks to our persistency.](<https://preview.redd.it/gj8y8g0nwxy71.png?width=3840&format=png&auto=webp&s=24fc612f8e3a833e5715f246fdf9e360a957a18a>)

Why did we do that? Because we thought that casting lot of votes (possibly more than the total shares available) was a possible trigger to the MOASS. ^ (Spoiler: it was not.)

But then, we found another possible **\*\*trigger\*\***, something that we know could really put an end to all of this: **\*\*DRS our shares.\*\***

And what are we, eToro apes, doing about it? Literally nothing, or at least I cannot see the same commitment and determination to at least try to DRS on eToro.

I will say it again: **\*\*let's get this DRS-party started!!!\*\***

**\*\*Open a new request ticket from eToro, and ask them to DRS your shares!!!\*\***

[eToro customer service](<https://www.etoro.com/customer-service/>)

I did open a request two days ago and I also asked them about the possibility to move shares to **\*\*Interactive Brokers\*\***, since I know that from there you can DRS.

This was their response:

[At the moment share transferring is not possible...at the moment](<https://preview.redd.it/g0nbvjfd1yy71.jpg?width=2640&format=png&auto=webp&s=a11fe9bc1b0a8a6dade519d62e678b35087b581a>)

What do you say, should we push eToro some more?

Have a wonderful day everybody ■■■, and let me know what you think!

Edit: please be respectful in the comments, there's no need to be harsh one another.

Edit 2: [u/null-pointer-deref](#) might have found something interesting: "you will generally not be able to transfer products into your eToro account, out of your eToro account or to a third party at any time. However, we reserve the right to permit and support this functionality at our discretion, including, for example, the ability for you to transfer certain products between your eToro account and electronic wallets"

So we might give it a shot :)

Worth your time if you've come this far.
