I calculated the amount of shares owned by insiders using the Edgar system to track insider trades. I went to their most recent Form 4 filings for each person outlined below and put their File Date to make it easier for someone to try and prove me wrong. If any of these names sold GME...it would be reported to the Edgar system unless it hasn't been filed yet as the trade could have taken place in the past 10 days as that is the reporting timeframe for insider trades.

Someone find where I am incorrect on the following data:

Alain Attal 6/11/21 128,923

Bernard Raymond Jr Colpitts 0 as of 10/28/19

Edit to add TLDR which isn't actually a TLDR but additional information

TL:DR

I followed the same rule of only counting filings except for instead of Edgar it was on Fintel, and it was for Institutional ownership, ETF ownership, and Mutual fund ownership.

Sauce for these numbers: <https://fintel.io/so/us/gme>

For Institutional ownership - I used the Effective date 12-31-21 (Most recent available) I added only long positions and did not subtract shorts nor did I include puts or calls. The date range used for the effective date was January 1, 2022 till today 3/17/22 not including any from today*.

31,836,204 shares held by 466 of the 588 current institutions with GME holdings. Please note - 537 institutions are long only and these are only 2 1/2 months of transactions.

For ETFs- I used the Effective date 12-31-21 (Most recent available) I added only long positions and did not subtract shorts nor did I include puts or calls. The date range used for the effective date was January 1, 2022 till today 3/17/22.

3,919,315 shares held by 59 of the 125 current ETFS with GME holdings.

For Mutual Funds - I used the Effective date 12-31-21 (Most recent available) I added only long positions and did not subtract shorts nor did I include puts or calls. The date range used for the effective date was January 1, 2022 till today 3/17/22.

6,620,185 shares held by 74 of the 164 current mutual funds with GME holdings.

SO 8,900,000 DRS + 20,899,709 shares held by insiders + 31,836,204 shares held by 466 of the 588 current institutions with GME holdings + 3,919,315 shares held by 59 of the 125 current ETFS with GME holdings + 6,620,185 shares held by 74 of the 164 current mutual funds with GME holdings + 1.3 million restricted shares (according to the Q4 22' 10-K Page F-17) = 73,475,413

(10-K Cover Page) Number of shares of \$.001 par value Class A Common Stock outstanding as of March 11, 2022: 76,339,248

76,339,248 - 73,475,413 = 2,863,835 shares left of the shares outstanding just using reported numbers from 2022.

not including retail if it wasn't settled as DRS'ed by Jan 29, 2022, no information from 90 Mutual funds that currently hold GME, no information from 66 ETF's currently holding GME, and no information from 122 institutions that currently hold GME.

Breathing Intensifies

Edit 2: Clarification on data findings - The free float is all outstanding shares excluding Insiders, restricted, and I count DRS but I don't know that we should. (Shares Outstanding) 76,339,248 - (Insiders) 20,899,709

- (Restricted stock/Restricted stock units) 1,300,000 - (DRS) 8,900,000 = Free float of 45,239,539
