Does anyone know if there's a way to get historical data from IEX? I placed a limit sell order yesterday that didn't appear in their order book (don't yell at me I didn't sell I was just trying this out). The order book has limit orders in the \$100,000s per share in their live order book. I've seen my orders show up in their book previously for other stocks.

I'm curious if maybe my broker accepted the order and just never even sent it out to IEX?
