Like every theory it starts with an "Hear me Out!".

Normal disclaimer, I'm an idiot that don't really know the difference from my buggers and my poo, and sometimes I make a mistake and eat my buggers. Everything I say is stupid and shall be considered as such

With the recent news of the Stock Split in form of Stock Dividend, I was thinking.

A Stock Dividend is not the same as a normal Stock Split, it is yes a form of dilution, but does not impact directly the price of the underlying asset.

[<https://www.investopedia.com/terms/s/stockdividend.asp#:~:text=A%20stock%20dividend%20is%20a,can%20dilute%20earnings%20per%20share>](<https://www.investopedia.com/terms/s/stockdividend.asp#:~:te xt=A%20stock%20dividend%20is%20a,can%20dilute%20earnings%20per%20share>).

Now on a Friday GME closes at 200, after market hours it issues a Stock Dividend of 7 shares for every 1 (741), then a true ape with 1 share, gets deposited plus 7 shares getting then 8 shares.

Now the market opens and should correct the value true? Well I don't think so, because it would only correct if the apes sold, but they won't, they hold through the entire day and GME closes at 200, but now you have 8 shares.

Worst position, would be our friends the Shorties, well they now have so many more shares to go around, but for every share they sold naked, now they have to get an additional 7, and the price didn't go down.

It might be insta Marge.

Or I might be smoking Pot. (I am but still...)

Now I want you to call me an idiot (first), then try explain to me why I am an idiot and why nothing of what I said works like that and I am bad and I should feel bad.
