I haven't updated my numbers in a while but, assuming the gme float is 34,974,395; DRS is 8,900,000; borrowed shares is 20,130,000.

$20,130,000 + 8,900,000 = 29,030,000$

$34,974,395 + 29,030,000 = 5,944,395$

Am I missing something? There has to be lent shares outside of the float right? Do we almost own GameStop?
