The gmefloor.com websites just hit \$96,000,000.00 a share.

Ninety... six... MILLION dollars per one share of GME.

Do you know how absolutely insane that is?

And yet, the first thing that came to my mind was... "Well damn, I hope it doesn't happen too soon because we're not at \$100M yet."

Then my mind went one step further.

Imagine with me:

You wake up one morning and Ryan Cohen tweets:

"The floor is now \$100M. The mother of all squeezes can begin. ■■■■■■■■■■"

Loopring announces their own decentralised NFT-based stock exchange and GameStop announces that they'll be moving GME there.

Shorts will absolutely lose their minds trying to buy back the shares before their crime is exposed and THE APES WILL GET AT LEAST \$100M per share.

NFA, Buy, Hold, DRS, you know the deal.
