Is_self: False

I came across this and wanted to share it with you Apes, because it gives a very detailed **but easy to understand** rundown of everything we have seen in this saga. This seems to have been published in or before 2007, and the site it originated from (counterfeitingstock.com) does not even exist any more. But the information contained is as relevant now as when it first came out, and I think a great resource for **understanding the complexities yourself** or to **explain to friends/family/potential Apes** if you are having a hard time getting the message across:

https://www.petepetit.com/mimedx/downloads/Counterfeiting-Stock.pdf

Note that this is a PDF version on the personal website of an Atlanta businessman named Pete Petit, whose company had fallen victim to naked shorting. He seems to have kept a copy of the original document up on the site, although not something he produced himself. As a "sneak preview", here are some excerpts from it that I thought are particularly interesting:

"Short Iceberg" that shows how they circumvent Reg SHO and hide their naked shorts:

[How far down the list are we now...?](https://preview.redd.it/lyza02t0w8n71.jpg?width=623&format=pjpg&auto=webp&s=06aaa40da332907e77301fa2e41bae89a2432be2)

A list of all the methods they use to drive down the stock price, including:

1. Ladder attacks
2. Media manipulation and attacks
3. Negative Wall St analyst reports
4. Planting moles in target companies
5. Tipping the SEC to investigate target companies
6. Lawsuits against target companies
7. Interfering with partners/customers/financiers of target companies
8. Pulling margin from investors who are long on the stock
9. Paid shills (the writer calls them "bashers") on internet message boards
10. Buying political influence

Any of that sound familiar to you...? Each one of these is detailed in the **Appendix** **section** and if you have no time to look through the the rest, just go to page 18 and start there...

Let me leave you with a preview of Appendix L, about how the SEC and other regulatory agencies have deliberately made their enforcement apparatus so that they give the **appearance of doing work**, when in reality they are **not doing any meaningful work at all**:

[A tale as old as time...](https://preview.redd.it/47lthl2hw8n71.jpg?width=628&format=pjpg&auto=webp&s=5f310e14f653210fd3d84f66181a5278767fb189)

Hope this is as enlightening and useful to you, as it has been for me!
