All of you who are putting your faith in RC are blind to the facts.

Chewy has NEVER been profitable. NEVER. They MIGHT turn a breakeven point in 2022.

RC sold his shit to PetSmart and ran off with the money. (Good for him.) That doesn't make him a genius, in fact, one could argue he's a huckster like the rest of them on Wall St. He sold a company bleeding money and ran off with a fuck-ton of cash. WHAT makes him special? NOTHING.

I am betting that RC and friends will do the same thing with GME. Sell off an unprofitable company, fill his/their pockets with cash, and leave us all holding the bag. He did it with Chewy. What makes you think GameStop is the Golden Child? It's not.

Y'all better get your collective heads out of your ass. RC doesn't give a single fuck about the investors in GameStop.

I have my shares drs'd and I've already accepted the losses and chalk it up to getting caught up in the hype.

I am not selling, but I am not holding out much hope either.
