The US Government and it's corrupt officials were colluding with each other since the very beginning. They all are aware of what they did and what they continue to do. The US CEC and DTCC is infiltrated by current citadel employees(one you are and citadel employee, you are always on their bankroll). The same is said about the politicians, as you can see that they are paid very well for very few public speaking. They have all colluded with each other. That is why in an unprecedented event ensued on January 27, 2020, they prevented the buying GME and kept the sell button so people would mass panic sell. They knew that the securities (Short Swaps) were in trouble because it was backed by the federal reserve.

The MOASS will not be just GME going tits up, but also: some other stocks. Can't name because of the censorship of this subreddit. These greedy fucks are not only fucking with one basket but others as well. The marijuana stocks have been heavily manipulated and I think they are in a swap of their own. I'm speculating but there must be more baskets.

These Swaps baskets are designed to bring the company to bankruptcy so their competitors can buy what ever assets they want. For example Trade patents and the like.

That's why you see new CEO being brought, hired for almost dead companies. These CEO's then pillage the companies. Look at the ex CEO of Sears and how he handled that company. This has been happening all around the world including in the Canadian Stock Exchange.

All these hedge funds are colluding with each other, including the Federal government and reserve, in the name of pure greed. Fuck the American Tax payee. The rich don't pay there fare share so I guess they figured they can get away from fucking them more.

For example a stock in Vancouver that is being heavily manipulated is Netcoins(Digital Brokage), a direct competition of Coinbase. Coinbase is backed by these hedge fund because they are using coinbase to print fake tokens from bitcoins. This is another method these fuckers have been gaining capital. They have been manipulating the market to the extent of the federal reserve. This is why Powell is printing as much fake money as they can, while he still can.

I think the Biden adminstration is aware of this and is trying to prevent a total economic collapse, they have been kicking the can down the road and getting ready for the MOASS, then an economic recession or depression worse than the 2008 recession but with different securities.

The same people that are in power are still using the same corrupt methods to maintain power and rob the American Tax payers. The same banks the caused the 08 collapse will cause the next meltdown

Hopefully this time, the corrupt fucks get heavy jail time for their crimes against humanity and the world. Because the US currency is the main currency, this shit trickles down across the world
