

Title: Just bought 40 shares of GME, my order status/confirmation shows two separate orders (30/10 shares) not one (40 shares). I don't think I've seen this before on previous orders

I just made a limit order of 40 shares of GME. **I made one limit order**, not two separate orders.

My TDA order status shows filled but shows **two transactions**. One for 30 shares, one for 10 shares.

The order number is the same for each as are the timestamps for when the order was entered and reported.

I don't think I've ever seen my orders broken out into separate quantities. I hold XXX shares and I've been purchasing for a while now so this is not my first time at this rodeo.

Why would 40 shares (certainly not a whale type of order) be broken out like this?

It's a cash account if that matters.
