See above

Update:

From u/yamayakuzaki

"CS uses Merrill Lynch and others as brokers to transact each purchase order submitted by apes (like you said, only applies to purchases as transfers don't go through dark or lit...they just get transferred). Merrill Lynch / other brokers then go to the market to get the order filled...while they SHOULD put them through lit exchanges, nothing's stopping them from going through the dark pool. More on CS's broker selection policy here <https://www.computershare.com/je/broker-selection-policy>

That said, it doesn't matter whether it's lit or dark - price discovery is not the goal here....taking share leverage out of DTC/SHFs hands is the goal."
