I first sent Loopring from Kraken to L1 Gme-Wallet.

Now I also transferred LRC and ETH from Kraken via Layerswap to my L2 Gme-Wallet and activated L2 in my Gme-Wallet.

When I now try to move my LRC, which I have in the L1 Gme-Wallet to the L2 Gme-wallet, I still get the "something went wrong approving the token"-message.

Can an ape help an ape here?
