Sup fellow retards, Computershare sell limit recently changed to 9 999 999\$. A few months ago it was 1 000 000\$ per order, 250k per share, that making the maximum value you could sell one share, 4 per order. In this recent change, did they also increased the 250k per share, or are they simply letting us sell more shares per order?? if its still 250k per share we should ask them to increase it, my floor is way bigger, my gme shares are worth more.
