Here are a few reason why this is going to be amazing for us and our favorite stock!

1) GME is effectively giving retail traders more ownership in the company.

2) GME is also saving themselves from spending even a penny on paying out a dividend from the cash on hand by doing it with stock.

3) This is a dividend which means we are receiving a value from it, not just maintaining the same value that we had previously.

Ex: 1 share at \$200 is now 2 shares at \$100 each. This example isn't the case with a stock dividend, only a stock split.

Our example would be 1 share at \$200 is now 2 shares at \$200 each.

^ the caveat to this would be that maybe we do a share split and then stock dividend so that we are receiving cheaper shares, making the dividend value less than it would be at current prices.

4) Lastly, a stock dividend is how Bill Gates and early employees at Microsoft got very wealth. 100 shares bought in 1986 turned into 28,800 shares after 25 years.

All of these together get me so jacked for what's to come!

Can't wait for market open! ■■■■
