Is_self: True

Body:

I thought I knew a few things about the perversity of the Federal Reserve and it's surreptitious founding as well as it's hand in the theft of a nations wealth. Apparently, that was only the parlor room in this mansion of horrors and I was not aware how much more there was to explore...

Debt/war/debt/war. I always thought it was about the money. It's actually the formula for enslavement. I've read various things over the years purportedly from "Rothschilds" or from sovereign individuals that paid reverence to "slavery"....but I always thought it to be more figurative hyperbole. Unfortunately, it's not.

(I'd be happy to hear input from anybody who is further along in understanding these things, as I've only begun to scratch the surface. I'm not a lawyer and these things are marinated in subtleties.)

So this country starts off as independent and sovereign people in independent and sovereign states. When they all get together to party they call themselves the "United States of America" with an initial Articles of Confederation describing a Union amongst a collection of free and sovereign states.

At some point, we grow big enough to see need for shared common defense and other things in a shared Federal government plus the Articles of Confederation have some limitations. This is an area of danger, fraught with the peril of pernicious creeping mission scope into ultimate tyranny....so it's a big deal to circumscribe the limitations thereof within the Constitution. The Federal government of the United States of America is born and referred to legally as the "United States" in the original Constitution.

There is a distinction between the two words...the "United States of America" is a collection of free sates in the Union, the "United States" is in essence the federal government (when the states get together) that is limited in scope by the "Constitution for the United States of America." Note the word "for" and the lower case lettering here.

OK. Sprinkle in some divide and conquer over race/religion/geography/economics/slave labor....mix with agent provocateurs and people on the Rothschild payroll and you can ferment a war. The Civil War accomplishes the goal of destroying US financial independence and a bankrupted nation requires financing from the very forces that pushed its buttons in the first place. But the "formula for enslavement" doesn't work on free and sovereign people or states...so a frame shift is demanded.

In 1871 Congress passes "An Act to provide a Government for the District of Columbia" in which the District of Columbia is incorporated as the "UNITED STATES OF AMERICA"....a city-state within its own country. And the original Constitution becomes an adjunct to the new corporate entity in the corporate governance as "THE CONSTITUTION OF THE UNITED STATES OF AMERICA". Note the use of "OF" as

well as all-caps, which denotes a separate legal entity...a corporation.

Some authors claim the UNITED STATES OF AMERICA to be foreign owned at this point...makes sense as collateral, but I can't actually see where this information would be found as of yet.

Other authors state this whole clusterfuck was legally borked from the beginning and make strong claims that a corporation is a dead entity and thus cannot govern and is just doing commerce.

Regardless, 2/21/1871 (the date of incorporation) was a major landmark in US history you've never heard about.

\----

Fast forward to the 20th century and there is a quickening. We get the Creature from Jekyll Island (Federal Reserve) passed in the dead of night 1913, and we all know what den of iniquity that is. What I didn't know was that they later handed the fucking Treasury over to these clowns too! (should be obvious by the scheme the Fed runs with treasuries in retrospect). So now a foreign banking cartel is made a fiscal agent of the US.

Now what's that enslavement formula again? Oh yeah, cue a war to empty the coffers and run up the debt. After WW1, Congress hands over the coffers of the Treasury to the banking cartel with the 1920 "Independent Treasury Act"...and they clean them out and orchestrate a market crash and depression.

So keeping score, the Rothschilds own the government, the media, the money supply, the banks, congress, and the treasury. All that's left are the people. With a decade of people being broke, hungry, and desperate...you could pass anything on the unsuspecting public at this point.

Another Corporation is made in 1925: The UNITED STATES CORPORATION COMPANY which is chartered in Florida. I'm totally unclear how free and sovereign states get converted into state Corporations and attached to this...but through some mechanism the entirety of the great land is rolled into a single UNITED STATES CORPORATION COMPANY and is bankrupted after the great depression. In 1933 Congress handed over the reigns of the US to the President (and CEO of the UNITED STATES CORPORATION COMPANY) and declared a 'state of emergency' to effectively transfer those (unconstitutional) emergency powers. That state of emergency has remained in effect since 1933 and the Constitution for the United States of America was basically PAUSED while the Corporation was run by it's CEO.

I always knew that FDR was used as an agent for the Rothschild cause particularly around the war...but really had no idea of the depths of deception the man was involved in. Gold confiscation, and forced use of Federal Reserve Notes are his doing along with a journey to start packing the Supreme Court so there is no way to return from the depths of this transition.

So what we have now is essentially the entire wealth, property, and people of the United States of America

placed into a public trust and becoming the "property" of the international bankers through bankruptcy claims upon the UNITED STATES CORPORATION COMPANY. The IRS is chartered as a mechanism to collect on these bankruptcy claims for the international bankers, and the entire legal system as we know it goes from common law....into a obscured system of acts/codes/procedures that are nothing more than the daily administering of the "bankruptcy procedures" of the corporation on behalf of their creditors. Like, nearly the whole legal system is just that....this is where "sovereign citizens" claim that they are not a debtor in this system and therefore this (fake) "legal system" (if you could call it that) does not apply to them. The rest of us continue within the system unaware that our signing of documents routinely presented to us is "opting in" to this hidden system.

The entirety of the US system has been inverted. The states are corporations serving the larger corporation (an inversion of federal limitations and state's rights)...and they are governed not by common law but Universal Common Codes that are in essence corporate policies. Courts are nothing more than the effectors of public policy for the corporation. The agencies in the "government" just execute corporate policy. The media (+CFR) execute corporate marketing. Welcome to Prison Planet.

I'm sure I've muddled some things here, but wanted to try organize my thoughts on paper a bit. Thanks for any corrections in advance.

(As an afterthought, some of the things previously discussed might make a bit more sense in this greater context. The goal of this system is to extract as much from debt servitude as possible. So when people tune-out, drop-out and live a life not plugged into the consumer/debt economy...they are a net drain on the system. When some groups become so impoverished that they can't support the debt economy any more, they are viewed as a net "drain" on the system because they need support. Is this why marijuana was used to destroy the black community? Is this why heroin was used to destroy the hippie movement?)
