Throughout the ages, when the powers that be called forth a new world order that spans the globe, they didn't intend for We the People to be anywhere near the helm of it.

They squashed, fomented, or usurped National revolutions .

They have infiltrated, busted, or swayed counter cultures, civil rights, union and other class movements.

They have withheld, undermined, and weaponized informational, medicinal, and technological advancements.

And now, when struck at the heart of their power structure (economic control) they will do anything to oversaturate, suppress, harness, or destroy (which is a synonym) a decentralized economy. They will stop at nothing to stamp the fires of men out, until they get their weasely hands on the source of the flame. It appears they are yet again about to drive everything off a cliff. The old fallback.

The problem with playing the long con is your risk of exposure increases with every cycle. The greatest minds among us recognize the patterns, the players, and the strings connecting everything. It's a twisted array of leashes we've been on. But, each leash is only a rope with a noose at both ends.

We have instinctively tied in to our communities, favorite brick & mortar establishments(GME ■■■■), and a group of blockchains. Which are a lot stronger than a bunch of strings and puppets.

Hope this helps some of us hodl through what's to come.

Oh. And If you're on the other side of history?

Hang tough.
