Who is the shareholder on gmes book of record for institutional shares? The brokerage or dtc / cede and co?

If it is the brokerage, then once we lock up enough of the float, will brokerages start transferring their shares to us at CS directly instead of dtc withdrawal? Will that be sign MOASS incoming?

Are cs accounts allowed to inspect the list of shareholders and how many owned? If so, could we find out by having a brokerage disappear from the books? Would this be a faster way to find out change in position vs a 6 month late 13 whatever filing?
