I know this has been asked before, but not nearly enough to the extent it needs to be given the importance of it. If we're expecting a payout this substantial, in a timeframe this small, wouldn't the market completely destabilize and possibly collapse? I know there have been some rules put into place to protect certain parts of the market, but it's a bit ridiculous to think that things will continue to go on as normal once moass is paid out. Why would the govt be complicit with this payout to apes? Why wouldn't the economy completely collapse once this happens? If you know the answer to any of these questions, please feel free to answer. Thanks

Edit: downvote me all you want lol, but there has to be a time when we talk about what really matters.
