Our own Play-to-earn cryptocurrency

Limiting the creation (minting) of new blueprints using just the AI will not be enough. To ensure the Blockchain is not flooded with useless blueprints, we will also create a cryptocurrency called Factorio Blueprint Token (🔗). You will need to pay 1,000 of them to mint 1 new unique blueprint. Factorio Blueprint Tokens (🔗) are earned from Space Science using a variable conversion rate we will control. Since you can now earn crypto by just playing the game, the game basically pays for itself.

Factorio Blueprint Tokens (🔗) come with all the advantages of a proof-of-work cryptocurrency, and all the fun of playing Factorio and optimizing factories for maximum UPS. Some say that Factorio offers so much value for money, that they paid more for the electricity bill than they paid for the game, so we are happy to take it to the next level.

We will host an Initial Coin Offering (ICO) for Factorio Blueprint Token (🔗), so make sure you invest as much as you can and HODL it, in the hopes that someone will tweet about it making the price go to the moon 🚀🌕. [Click here to take part in the ICO.](#)
