I am so excited that RC has publicly announced that he bought 100k shares today! I had given a prediction today midday that the price rallying could be due to him buying his shares.

But I think there is more to it than it seems to be. Check out the 30 minute chart below. RC in his form -4 released that he bought 100k shares at an average price of \$101 and at a high of \$108. Well guess what? The price was only below \$108 before 12:30 PM today. And most of today's volume was only traded after 12:30 PM today!!

[30 minute chart of GME](<https://preview.redd.it/r1c9jzkuo0p81.png?width=1380&format=png&auto=webp&s=f2723321ae1a52830733bc4dea9907fbb307e2ef>)

****So what does this mean??**** This means that RC could have bought more shares after 12:30 PM but not have disclosed it in the form-4 today. The form-4 for insiders has to be released within 2 business days of buying the stocks; then why did RC disclose it today itself?? I think RC was testing the waters to see how much of an impact his announcement would have and *1.) he has already bought more shares today (resulting in the huge volumes we see after 12:30 PM) and 2.) he plans to buy more shares over the next couple of days before which he has to disclose today's position completely.*

But who knows, I am just a dumb ape who eats crayons. A smart-brain ape please tell me I am wrong else I am buying more soon lol.

****TLDR**** \- Theorizing that RC has bought much much more than he has disclosed today. We will get to know in a couple of days time.

I am not a financial advisor and this is not investment advice. Please do not invest (buy or sell) based on what you have seen on this post.
