DRS; yes, solid theory for GME. But why (for the love of god) was there not a push to test that theory with KOSS (remember, sneezed same in January). Tiny float (single millions and less than a 10 a share). Low low share price. Hell, we could buy the float up in an afternoon to test the theory of naked shorting etc. I am aghast that it was the 50mil float we decided to try first.
