Disclaimer - All float/share numbers are based on the data presented at Computershare.

The focus of the DRS effort has been to lock up ownership of the free tradeable float which stands at roughly 34.7 million shares. Per the latest GME 10-Q released today there have been 12.7 million shares registered with Computershare. DRS ownership of the free float is approximately 37%.

What I think is a more unique perspective is the fact that Insiders plus DRS shares own 34% of the total outstanding shares of the company. 34% of the total outstanding shares in the company are essentially locked down. I haven't seen anything like this in my 12 months of investing. This will be interesting to track in the future.
