Title: Is the reason the March cycle didn't happen is because SHF's are rolling GME DOOMPS to XRT DOOMPS? What does this mean for future cycles?

n_is/

TL;DR: Are SHF's preventing future cycles by rolling DOOMPS back and forth between GME and XRT? I present a theory, but I'm not sure if it is correct.

For months I've been following the DD of the community, most notably those posted by: /u/Criand, /u/taimpeng, /u/PWNWTFBBQ, /u/Immortan-GME, /u/MauerAstronaut, /u/Zinko83, /u/Turdfurg23, /u/bobsmith808, /u/choompop.

And it seemed that we finally found a reliable \~3 month cycle cadence based on DOOMPS.

- 1. DOOMPS that expired on 1/15/2021 ran GME 230.24% from **2/24/21** to 3/10/21 (run occurring 40 days after expiry)
- 2. **89 days later**...DOOMPS that expired on 4/16/2021 ran GME 96.56% from **5/24/21** to 6/8/21 (run occurring 38 days after expiry)
- 3. **91 days later**...DOOMPS that expired on 7/16/2021 ran GME 42.53% from **8/23/21** to 9/2/21 (run occurring 38 days after expiry)

Then the pattern starts to break down: because the DOOMPS that expired on 10/15/2021 did NOT lead to a GME run \~40 days after expiry on 11/24/21. The OI for this expiration was magnitudes lower than previous quarters BUT also: **could SHF have rolled GME DOOMPS to XRT DOOMPS** expiring 11/19/2021 to prevent the run up? ^(Maybe this was the reason for the "NFT marketplace" gap-up on 1/7/22 (49 days after expiry, but remember a few holidays between).)

Then SHF's handed the bag back over to GME DOOMPS expiring 1/21/2022 and the reason there was no March run is because SHF rolled GME DOOMPS to XRT DOOMS expiring 3/18/2022.

So the question is: after the SHF able to just continue DOOMP covering between GME and XRT to postpone cycles forever, or will we see a run 40 days after 3/18/2022 (approximately Wednesday, April 27, 2022)? **If the "April cycle" is to be postponed I would expect to see more DOOMPS loaded onto the GME options expiring 4/14/22** (because it seems that as long as they load up DOOMPS before the expected run date, the run doesn't occur?)

Would appreciate some apes more knowledgeable with market mechanics lend some wrinkles to see if we can answer this question.
