Jon\_HQ @Jon\_HQ · 47m It appears that an attacker is using smart contract 0xa2c0946aD444DCCf990394 C5cBe019a858A945bD to interact with OpenSea's new exchange contract (v2)

I am very unsure how this is working or what is being exploited but it seems that OpenSea's new contract is aboslutely rugged.
