Well kids. here we are. Why not just begin on a few things. blackrock goes long. loans the shares. now the loaning is broken so they be selling them over. then they get shuffled around until theres 99 managers on teh same holding, (**cough cough GME in their 13f***), and I found that pattern to be stupid. In the US they trade under BLK. https://fintel.io/so/us/blk

for this underlying i will put a plain chart for reference ibecause 2020 looks really strange to me on fintel. Here is the chart for \$BLK from yahoo. Shows a current high on the 27 chart and a low as of 03/2020. Pretty good run up for a 2y. 250%ish? 275%ish? I dont want to so i'll just say Is can't math correctly. But thats okay. looking at their holdings neither can they.

Institutional investors ofc, are Blackrock and Vangaurd. Comical to see them EVERYWHERE in this same pattern. Even into themselves. This should be widespread patterned across my breakdowns.

Now, Hopefully you guys know exactly what to look for since I have taken the burden of a paywall from Us. <3. They don't realize they are playing with house money. The house money is OUR money since we pay taxes. They can never be self supporting without this. So while we are waiting for those taxes to be transformed back into a stimulus check so we can survive, Let's look at some of their holdings.**looking at you anon, where the fuck are you for this raid***

[top position = %FMAGX - Fidelity- 1,943,697.97% return. oof.](https://preview.redd.it/4iyy2phbrcj71.png?width=1308&format;=png&auto;=webp&s;=dc924baca860c91e2d2606f2abc7a0d81b75405c)

those are all the top positions with the highest % returns in their holdings. Killin it right? Yes that says 1,943,697.97% return. Divide that shit by 1000 and you still get it. Fucked up right? Just wait boys until you see what Gamestop becomes. :) Also please pay attention to the #8 spot with that -2B cost basis. Neat.

Below is the continuation of top % returns for transparency reasons. Fuck the paywalls.

[](https://preview.redd.it/si35yvcxrcj71.png?width=1289&format;=png&auto;=webp&s;=20b4300ef13cb1679e2f46a39dbbd6bf6c6ace58)

2 positions REALLY stuck out when looking at the put/call positions. These following lists are going to show the "accounting errors" in their equity positions followed by their "accounting errors" with the puts/calls in both BnP paribas and Simplex Trading.

\#1BnP paribas >

https://fintel.io/so/us/blk/bnp-paribas-arbitrage

[interesting investment strategy. seems specific.](https://preview.redd.it/7eon164iucj71.png?width=1019&format;=png&auto;=webp&s;=498f0786fdc3956e98fd2f386d27821b54fc7e0f)

equity swaps anyone??? farther down at the bottom of those equity positions is another "accounting error" showing 16,000% return on a 24,000% change in alocatoin. Damn. 24k% allocation? how many times you gonna allocate the same allocated stuff. ITS ALREADY ALLOCATED ffs. (shakin my head)

https://preview.redd.it/afvcipt0tcj71.png?width=1266&format;=png&auto;=webp&s;=b3d568605a3ccd0dd9b409f2dda1f982c9e6b31f

So let's look at blackrocks call/puts into DnB paribas. Immediately Please pay attention to the allocatoin on row # 2. That would be the fourth row from the right.

https://preview.redd.it/ws7sy298tcj71.png?width=1269&format;=png&auto;=webp&s;=7a9ea88ce188e38f353fe6ad3a5c732c6ecc7893

What TRULY caught my eye was the allocation amount. Darkpool uses a lot of allocation right? And if they traded shit off exchance, bouncing the price up through high frequency trades and then BAM assigned this astronomical price "on exchange", it would appear like it does. Right? That's a lot for average per share with that allocation amount. \$84,000 per share? Wonder how they can do that, like that. xD Below are the same patterns in their PUTS they seem to like to have. hmmm. Wut doing b.rock?

https://preview.redd.it/js187tpotcj71.png?width=1277&format;=png&auto;=webp&s;=779a3258f8341e65dcd49cbc17b762c78e33e6da

Above we can see an average of \$81.4K per share, and allocation % is 300,000+. Super Colossal duechebaggery detected.

and#2 Simplex trading >

https://fintel.io/so/us/blk/simplex-trading-llc

What I am trying to show here is an interesting timing of the put/call positions. I see the patterns based on my other breakdowns, so please take this into consideration. No 1 of my writeups will show the whole story. You gotta grab some coffee and just go through them. I think I have done like 30 of these by now. Can't stop Won't stop;)

[information is good.. this is just here for reference.](https://preview.redd.it/smutcsr9ucj71.png?width=1273 &format;=png&auto;=webp&s;=6a01d2be45e55f9e03acffe90d887b48b7f57308)

[I took the snip low enough to show a -cost,-profit-%return.](https://preview.redd.it/l8x4dxbwucj71.png?wid th=1263&format;=png&auto;=webp&s;=a01b13ad6e7f2c4ff35bedf3532a7691339399d1)

Looking at the top 2 positions blackrock took into simplex calls, we can see they made a % profit of

\-5,778% on that last reporting period. Thats worse than me and my year long hodl. I was only -95% all year. You would think they would have learned from the previous reporting periods that -% returns suck and losing money sucks. Especially when you pay \$38k average per share.

2nd to top reporting period shows the inverse of that cost basis and profit. -\$714M cost basis and +\$710M on the profit. Return is 4,295% on that reporting period. Numbers are cool but this shit just doesn't add up. This is who we are depending on to "make our market?" My 5 year old cousin plays monopoly more honest than this.

https://preview.redd.it/6yy8zyc1vcj71.png?width=1268&format;=png&auto;=webp&s;=b3d37c53312cf3516a80c9d914b0d85dfc6b2163

These guys paid 10's of thousands per share on average. High of \$73K per share. See the % return for the top postion? it's -6300% return. Nice move douchebags..

[literally just look at this. They used the Uno Reverse card!](https://preview.redd.it/pxli17567ej71.png?widt h=307&format;=png&auto;=webp&s;=a7550739f7cabe2758ef328b4582d98f151e0883)

I mean. Just literally. Go through these lists with ur retarded calculators and see if you can help them fix their books. These books are so cooked their fucking burnt. and when the shills come in here and say anything stupid. Talk GameStop to them. The funny thing is, they didn't expect us. They underestimated us. They're not retarded. They're stupid.

There are many other blackrock holdings, and many other Blackrock positions to discuss. This here be the first of a few to come. I present this data as a way to reach out to those that matter. If you are confused please read my Jetblue DD. It will show my thinking. If that shit doesn't make sense check out the video I did. Blackrock and Vangaurd are brothers helping out their stupid little cousin Kenny.

Why not say fuck the chart for a day. Become collectors of information. Be dreamers to not see what is but what is possible. And be creators of that reality which you wish to see. I believe the time has come to do a full breakdown in written form, of those who hold my GameStop. This is my attempt to show the world, That you all need to wake up and see exactly what must be done as fast as possible. Go backwards, really fucking fast, as fast as you can. And start with Victoria's secret DD. I know it was made by a redditor who didn't see what i saw. Our perspectives were different. That's okay. It's what makes all of us players special when we group up for a raid. All different ways to think and learn and grow come together. To the moon players!

Hey kenny, Got any continues? I didn't think so. seems like its:

Can't stop Won't stop

Edited for more information and depth. I will always try to clarify for you all as long as they leave me tf alone. I got four vpns up right now thanks to the community and their support. I wouldn't be able to do this without you players.
