I know we're going to get the official numbers from GameStop on Wednesday, but please hear me out.

#PART 1

DRS per GameStop's numbers:

October 30 5.2M

January 29 8.9M

October 30 - January 29 +3.7M **Average per month = 1.23M**

Using computershared.net's calculations since they were spot on last time (1/29):

April 30 12.1M

January 29 - April 30 +3.2M **Average per month = 1.1M**

Today on computershared.net is:

13,006,560 - 12,127,000 (4/30) = 879,560 since April 30.

Two days to go so let's call it **900,000 per month**. A decline despite the recently low GME prices. Yes, I'm sure some people adding on haven't been reporting, but that's a small-time difference, if any, because of average per ape reporting being used.

So, you can see the DRS shares per month have dropped each quarter.

#PART 2

The rate of new CS accounts over time:

34,000 in October

15,000 in November

17,000 in December

10,000 in January

8000 in February (28 days)

10,000 in March

12,000 in April

8000 so far in May with only 2 days remaining.

Again, you can see the rate decline.

My biggest worry about how long it will take to lock the float is that once all apes on Reddit who still have

yet to DRS finally do so, the CS account high score will almost completely stop growing. This day is just around the corner! **Let's face it, with the dividend stock split news, if any current ape is not DRSing in May before the June 1 earnings announcement and June 2 shareholders' meeting, they're not going to.** Then, our DRS total will only increase by the amount of shares existing DRS apes are adding. Then, instead of our numbers growing by 1.23M per month (based on Oct. 30 - Jan. 29 GameStop earnings release dates), they will only grow by, optimistically, 750,000 per month (if all of the 150,000 existing CS accounts add 5 shares per month). At this reduced rate, it would take until October 2024 to lock the free float of 35M or 5 years to lock the 63M float! Even IF we continue to DRS 1.23M shares every month from now on, it would still take us until 2025 to DRS the 63M shares.

#This is why these 3 things are CRITICAL!!:

1. **We need to educate the masses outside of Reddit what DRS is, why they should do it, and why GameStop is an incredible investment** This is exactly why we started:
#WWW.DRSGME.ORG. Please see the NEW page we added Friday as we prepare to launch our global advertising campaign.

Please share it wherever you can!

[IRA DRS no tax event](https://www.drsgme.org/direct-register-shares-from-ira-in-kind-direct-transfer)

2. Apes with money tied up in **"other investments", consider converting those to GME and DRS**. What other investment could possibly compare to GME?!? Even IF others can sque*ze, they can't sque*ze like GME and only GME has a massive turnaround plan.

"But Miller I don't want all my eggs in one basket. That's why I have other basket stocks." ... Well, the only reason those other basket stocks MIGHT go up is because they're tied to GME, so your eggs are still in one basket (at best)!

3. Apes with shares in **Etoro, T212, and Freetrade: think about selling and re-buying elsewhere!!** It's the only way to DRS with them! These 3 brokers will not transfer to another broker nor will they DRS. Why in the heck would you think they have shares?? They simply take your money and place your bet. Please **don't trust your millions to a broker that won't DRS! Seriously, go read their TOS. (Link at bottom)

Get to WORK and spread the word about www.drsgme.org to the masses outside of Reddit and DRS your max! If you haven't DRS'd, why not?!?! I don't trust any broker now. I certainly won't trust them not to screw us over with the upcoming dividend stock split or during MOA*S when they're facing insolvency. Make an informed decision, read your broker's TOS!

#Lock the float!!! DRS 100%

#Changing the world is what's at stake!!

#TLDR: DRS! Use drsgme.org to educate those outside Reddit.
