Title: I just recently applied for a job as a junior trader for some place that analyzes the carbon markets I

took a screen shot of my cover letter

I may not have the experience your looking for but I have tremendous experience in YOLOing my life savings in to Meme stocks. I have gained over 10,000% in my portfolio in doing so. I am what most wall st. Analysts would call an Ape. I have a huge position in GME and will continue to HODL. I have no exit strategy. I don't have any experience in the carbon markets but I'm sure I can be asset to your company by YOLOing all of your money into GME. Diamond hands!

Sincerely
